# Contents

0	Summary	vii
1	Mobile substitution is causing problems for companies	1
1.1	Mobile substitution is causing uncontrolled cost increases	2
1.2	There is a range of solutions that tend to reduce the revenues of MNOs	4
1.3	Can operators address this revenue leakage in ways that bring benefits for their customers?	5
2	Enterprises are finding their own solutions to high mobile charges	7
2.1	Fixed wireless gateways can drastically reduce the bill for calls to mobiles	7
2.2	Softphones and WiFi can sidestep punitive roaming charges	8
2.3	Software can integrate the mobile with the PBX and use least-cost routing to manage calls via the fixed network	10
2.4	Systems integrators and software vendors can help companies to bypass the operators	12
3	MNOs can solve problems by using pricing plans and software	14
3.1	Home-cell and intra-company pricing can remove many price problems	15
3.2	MNOs can offer picocell-based VoIP systems	16
3.3	MNOs can provide PBX features in the network	17
3.4	MNOs can offer integration with the PBX either by selling or hosting software	18
3.5	Mostly-mobile can be the answer for some companies	19
4	Fixed operators are more likely to go for new technologies	23
4.1	Dual-mode phones are getting better	24
4.2	BT is leading the way with FMC systems based on dual-mode phones	25
4.3	Fixed operators already have expertise in enterprise phone systems	26
5	Voice traffic is migrating inexorably to mobile	28
5.1	Enterprise voice forecasting methodology	29
5.2	Fixed-to-mobile calling will remain over 20% of fixed phone bills throughout the period 2005–12	33
5.3	Change in legacy voice networks is driven by office moves	34
5.4	Mostly-mobile systems will be mainly for medium-sized organisations	37
5.5	Dual-mode handsets may account for 20% of new phones by 2012	38

6	Persuading enterprises to deploy FMC will be an uphill struggle	40
6.1	Enterprises will need a CIO on the management board to make the strategic decision to adopt FMC	40
6.2	Obtaining buy-in from end users can be a challenge	41
6.3	Service providers need to design appropriate incentives for sales staff	41
	Actions	43
	Market intelligence services from Analysys Research	46
	Reports from Analysys Research	47
	Custom Research: meeting your information needs	48
	Analysys Consulting	49

### List of figures and tables

<b>Figure 0.1:</b>	Enterprise voice service spend in Western Europe by technology type, 2005–12	viii
<b>Figure 1.1:</b>	Large and medium-sized enterprise share of spend on calls originating on the fixed network by termination category, 2005–12	2
<b>Figure 1.2:</b>	Large and medium-sized enterprise call spend by origination and termination in Western Europe, 2005–12	3
<b>Figure 1.3:</b>	Mobile voice usage versus the premium on mobile calls over fixed calls in Western Europe, 1Q 2006	6
<b>Table 3.1:</b>	MNO business offers in Western Europe	14
<b>Figure 3.1:</b>	Use of a picocell to provide an FMC solution	17
<b>Figure 3.2:</b>	Intelligence in the mobile network provides PBX features	18
<b>Figure 3.3:</b>	MNO supplies SIP intelligence on the large enterprise site	19
<b>Figure 3.4:</b>	ASPU on fixed and mobile calls in medium-sized and large enterprises in Western Europe, 2005 and 2012	20
<b>Figure 3.5:</b>	Mostly-mobile FMC solution	21
<b>Figure 4.1:</b>	Fixed operator FMC solution based on WiFi	25
<b>Figure 5.1:</b>	Total voice market in Western Europe, 2005–12	28
<b>Figure 5.2:</b>	Flowchart of forecasting methodology	29
<b>Figure 5.3:</b>	Options for traditional voice FMC	30
<b>Figure 5.4:</b>	Options for VoIP with FMC	31
<b>Figure 5.5:</b>	Enterprise voice service spend in Western Europe by technology type, 2005–12	32
<b>Figure 5.6:</b>	Large and medium-sized enterprise ASPU on voice services, 2005 and 2012	33
<b>Figure 5.7:</b>	Large and medium-sized enterprise call spend by termination, 2005–12	34
<b>Figure 5.8:</b>	Share of enterprise users by technology type, 2005–12	35
<b>Figure 5.9:</b>	FMC penetration of enterprise users by country, 2005–12	35
<b>Figure 5.10:</b>	Share of Western European enterprise FMC users by technology type, 2005–12	36
<b>Figure 5.11:</b>	ASPU in Western Europe on four enterprise voice technologies, 2005 and 2012	36
<b>Figure 5.12:</b>	FMC penetration of enterprises in Western Europe, 2005–12	37
<b>Figure 5.13:</b>	Mostly-mobile users in enterprises in Western Europe, 2005–12	38
<b>Figure 5.14:</b>	Dual-mode phone users in enterprises in Western Europe, 2005–12	39

## Author

**Margaret Hopkins** (Analysys Associate) is Principal Analyst with Exegesys. She started her career in the Post Office Telecommunications Long Range Planning Department.

During her 18 years working with Analysys, she has been lead author on many reports, including *Beyond Triple Play: forecasts for broadband value-added services*, *Scenarios for Enterprise Mobile Data Services 2006–11*, *VoIP versus Mobile: forecasts for the future of enterprise voice*, *The Business Case for Carrier Migration to VoIP*, *The Business Case for Broadband Entertainment*, *Delivering the Broadband Home*, *New fixed and mobile services and devices: forecasts 2003–2008*, *Broadband Value-Added Services for SMEs: market strategy and forecasts 2003–2008*, *Next-Generation Networks: integrated IP architectures* and *IP Voice Services: the return on investment for European service providers*. She holds a degree in Engineering from the University of Cambridge and a Master's in Telecommunications and Information Systems from the University of Essex.

## Acknowledgements

The author would like to thank all those who assisted in the preparation of this report, especially all those who gave their time for interviews and case studies: Roger Jones of Avaya; Rocky Mahajan of BT; Andy Oldfield and Tim Stone of Cisco; Magnus Leonhardt and Torbjorn Lundmark of Ericsson; Alan Wright of Motorola; Richard Bodin, David Perry and Paul Rowe of Nortel; Lesley Hansen of TeleWare; Catherine Hammond, Windsor Holden, Tim Wheater and Rupert Wood of Analysys Mason Group for their valuable comments and assistance; and Mark Colucci, Sarah Peake and Claire Varley of Analysys Research for their editorial support.

# Market intelligence services from Analysys Research

Analysys Research's online market intelligence services help you keep track of the latest developments in major telecoms markets worldwide. All our services are regularly updated and include a sophisticated range of interactive search, benchmarking and download tools.

- **Analysys Research Fixed Networks and Services** provides analysis of European operators and ISPs, country reports for 30 European markets, country market forecasts, commentary on industry trends and a module on the broadband market.

- **Analysys Research Mobile Networks and Services** provides insight into the strategies of key players worldwide, country reports for leading mobile markets, 3G status reports, country market forecasts and analysis of industry trends.

- **Analysys Research Billing and OSS Markets and Customers** includes a searchable contracts database, trends papers covering the latest issues in billing and OSS, and profiles of leading and up-and-coming vendors worldwide.

**Company search results**

Searching the database on the following terms:

Country: France    Range: from 011 countries

and/operation type:    Alternative service provider

and Products & services:    Cable TV

**Company profiles**

4 items found in our published content

Company name:    Location:    Website:    Contact:    Description:    Services:    Products:    Financials:    Operations:    Other:    Comments:    Add:    Edit:    Delete:    Refresh:    Print:    Close

- **World Telecoms Marketplace** is a leading source of company and contact information and includes thousands of records with data on company activities, financial and operating data, and contact details for senior staff.

- **Analysys Research Telecoms Systems Integrator Database** contains data on over 280 systems integrators, enabling equipment and software vendors to identify potential partners, competitors and acquisition targets in Europe.

**Products and services offered:**

- development
- hosting
- installation
- integration
- maintenance
- network management and monitoring
- outsourcing
- reselling

**Sector specialisms:**

- telecoms
- education
- financial services
- government and public sector
- healthcare
- manufacturing
- media and leisure
- professional services
- retail, wholesale, transport and logistics
- utilities

Our Analyst Support package, which allows you direct consultation with our telecoms experts, is an ideal complement to your chosen market intelligence service.

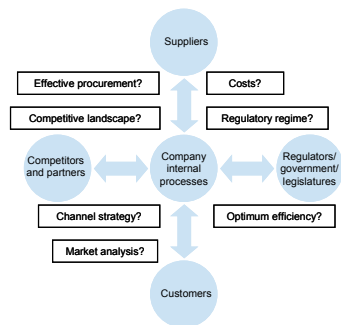

For more information on our services or a guided demonstration, please contact our Sales and Customer Service team on +44 (0)1223 460600, email us at [research@analysys.com](mailto:research@analysys.com) or visit our Web site at <http://research.analysys.com>.

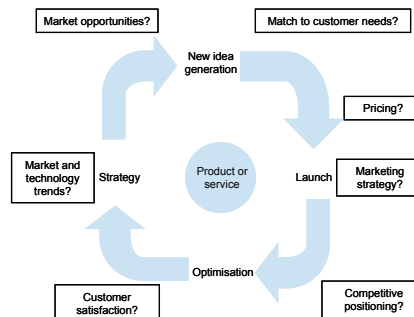

# Custom Research: meeting your information needs

Analysys Research has developed its portfolio of Custom Research services in response to customer demand for bespoke market intelligence, when more data is needed than is found in an off-the-shelf report or database, when there are complex questions about specific companies or markets that need to be answered, or when analysis needs to be tailored.

Custom Research can deliver real value when an organisation needs to answer specific questions about how it is positioned in the market, and how to optimise performance at various stages of the product or service lifecycle.

*Understand how your company is positioned*

*Optimise performance in the product or service lifecycle*

In answering our clients' questions, we bring a wealth of understanding of markets, and of techniques and services, including:

- desk research, data collection and interpretation
- benchmarking services
- quantitative and qualitative surveys
- market sizing and forecasting
- competitor and partner profiling
- white papers, presentations and workshop facilitation
- event and trend analysis
- procurement assistance.

For more information on Custom Research services from Analysys Research, or to discuss how we could help you to meet your specific information needs, please contact our Custom Research team on +44 (0)1223 460600 or email us at [custom@analysys.com](mailto:custom@analysys.com).

# Analysys Consulting

Analysys Consulting is a leading<sup>5</sup> international telecoms and digital media consultancy. We draw on our unparalleled industry experience to deliver results that enable our clients to compete and grow in these markets, as well as to exploit new opportunities.

Our experience, influence and unrivalled knowledge base are recognised globally – which is why we have been involved in some of the world’s largest telecoms projects and in transactions worth billions of dollars.

For more than 20 years, we have helped shape the telecoms industry through our extensive work on policy, regulation and finance. We have worked with most of the sector’s leading players, often at board level, to:

- determine strategy
- advise on merger and acquisition activity
- optimise tariffing of new and existing services
- identify and launch new business ventures
- improve profitability and cashflow by streamlining key operational processes.

Analysys Consulting services include:

- strategy and marketing
- pricing strategy
- scenario planning
- economic modelling
- due diligence
- licence awards
- mergers and acquisitions
- regulation
- interconnect
- spectrum pricing
- STEM (Strategic Telecoms Evaluation Model).
