About Analysys Mason	vi
0 Summary	vii
1 Introduction	1
2 UMTS900 offers a wide range of benefits	3
2.1 Outdoor coverage advantages enable substantial cost savings	3
2.2 UMTS900 can improve indoor coverage	5
2.3 Coverage advantages are not the only benefits	7
3 Regulatory delays have postponed the benefits of UMTS900 in Europe	9
3.1 Europe	11
3.2 The rest of the world	15
4 Support for UMTS900 is rapidly becoming standard in devices	17
4.1 USB modems boost subscriber and revenue growth, but revenue per megabyte for smartphones is much higher	20
4.2 UMTS900 could support early GSM switch-off, but rapidly migrating subscribers from 2G to 3G handsets could be challenging	22
5 UMTS900 presents a number of implementation challenges	23
5.1 Interference between GSM900 and UMTS900 systems must be managed	23
5.2 Techniques for increasing GSM capacity may be needed	26
5.3 Antenna engineering is potentially costly	27
5.4 Inter-frequency and inter-system handover issues remain to be resolved	30
6 Rural coverage extension is the predominant deployment scenario	31
7 UMTS900 will be widely deployed, but is not the only evolution path	39
7.1 GSM-only operators	46
7.2 Combined 2G/3G operators	48
7.3 UMTS2100-only operators	54
7.4 New entrants	56

Actions	57
Annex A: Case studies	60
A.1 Advanced Info Services (AIS), Thailand	60
A.2 Digitel, Venezuela	62
A.3 DNA Finland	62
A.4 Elisa, Finland	64
A.5 Elisa, Estonia	66
A.6 Optus, Australia	67
A.7 Síminn, Iceland	69
A.8 TeliaSonera, Finland	69
A.9 Vodafone Australia	70
A.10 Vodafone New Zealand	71
Key to acronyms	74
Research from Analysys Mason	75
Consulting from Analysys Mason	76

### List of Figures and Tables

<b>Table 0.1:</b> UMTS900 deployments at March 2009	ix
<b>Table 1.1:</b> UMTS900 deployments at March 2009	2
<b>Figure 2.1:</b> Proportion of wireless network downlink traffic that is generated indoors, 2008–2015	5
<b>Figure 3.1:</b> The impact of delaying spectrum refarming	10
<b>Table 4.1:</b> UMTS900-enabled devices announced as of March 2009	18
<b>Figure 4.1:</b> Revenue per megabyte of wireless network traffic generated by different types of device, 2008–2015	20
<b>Figure 5.1:</b> Sandwich frequency arrangement for deploying UMTS900 and GSM900	24
<b>Figure 5.2:</b> Carrier separation for UMTS900 and GSM900 microcells and picocells	25
<b>Figure 5.3:</b> Antenna configurations for GSM900/UMTS900 sites	28
<b>Table 5.1:</b> Evaluation of antenna solutions for co-located GSM900 and UMTS900 sites	29
<b>Table 6.1:</b> UMTS900 deployments at March 2009	32
<b>Figure 6.1:</b> UMTS900 deployment scenarios	34
<b>Figure 7.1:</b> Timeline of events influencing network evolution strategy	43
<b>Table 7.1:</b> Selected options for developing network coverage and capacity	44
<b>Table 7.2:</b> Selected options for introducing advanced mobile services for GSM-only operators	48
<b>Figure 7.2:</b> Average downlink wireless network traffic per cellular customer, 2008–2015	50
<b>Table 7.3:</b> Selected rural coverage options for 2G/3G operators	52
<b>Figure 7.3:</b> Illustrative network evolution path for accelerated GSM switch-off	53
<b>Table 7.4:</b> Selected rural coverage options for 3G-only operators	56
<b>Table A.5:</b> Optus's wireless broadband standard tariffs using UMTS900-compatible USB modems	68
<b>Table A.6:</b> Vodafone New Zealand's mobile data tariffs using UMTS900-compatible USB modems	72

## Author

**Catherine Viola** (Senior Analyst) specialises in issues relating to wireless network evolution. She is a regular contributor to Analysys Mason's *Wireless Networks* research programme, and her research interests include wireless network technologies, spectrum issues and network sharing. She joined Analysys Mason in 1996.

## Acknowledgements

The author would like to thank all those who assisted in the preparation of this report, particularly: Sylvain Allard (Product Marketing Manager, Alcatel-Lucent), Hans Beijner (Product Marketing Manager, Ericsson), Björn Geirsson (PTA, Iceland), Michaela Ilming (RTR), Jarkko Laari (Development Manager, Radio Networks, DNA Finland), Alan Hadden (President, GSA), Jean-Paul Rissen (Director of Wireless Technologies, Alcatel-Lucent), Glyn Roylance (Head of New Radio Technology, France Telecom), Hasan Sharif (Senior Manager, Spectrum Planning and Allocation, Telecommunications Regulatory Authority, UAE), John-Eivind Velure (Head of Section for Frequency Planning, Norwegian Post and Telecommunications Authority), Professor William Webb (Head of R&D, Ofcom) and Trond Wiborg (Director Technology Strategy, Telenor Norway). The author would also like to thank Analysys Mason colleagues Dr Terry Norman, Holger Niemann and Clemens Schwaiger for their input, and Sarah Peake and Claire Varley for editorial assistance.

## Disclaimer

Figures and projections contained in this report are based on publicly available information only and are produced by the Research Division of Analysys Mason Limited independently of any client-specific work within Analysys Mason Limited. The opinions expressed are those of the stated author only.

Analysys Mason Limited recognises that many terms appearing in this report are proprietary; all such trademarks are acknowledged and every effort has been made to indicate them by the normal UK publishing practice of capitalisation. # About Analysys Mason

Analysys Mason is the preferred partner to telecoms, IT and media organisations worldwide. Through our global presence, we deliver strategy advice, operations support and market intelligence to leading commercial and public sector organisations in more than 80 countries. Our clients rely on our consulting and research services to make better business decisions.

The intellectual rigour, operational experience and insight of our people have helped our clients to meet some of the toughest challenges they face within the industry. We have consistently delivered significant and sustainable business benefits to our clients during the past twenty years on issues ranging from advising on operator strategy and tactics, development of national sector regulation, through execution of major financial transactions, to the deployment of public and private network infrastructure.

We are respected worldwide for the exceptional quality of our work, our independence and the flexibility of our teams in responding to client needs. We are passionate about what we do and are committed to delivering excellence to our clients.

Analysys Mason offers two types of service:

## Consulting

Working for regulators and users, Analysys Mason has gained considerable expertise in the key issues affecting spectrum, including 2.6GHz auctions, the digital dividend and 900MHz refarming. In relation to 900MHz spectrum, we have:

- helped two Western European regulators to develop their plans by undertaking detailed economic cost/benefit analysis of alternative approaches to refarming
- supported a major European mobile operator in evaluating and responding to a government's consultation on approaches to spectrum when existing licences expire.

## Research

We offer research programmes and custom research to help our clients to identify key strategic issues, formulate strategies, identify trends and opportunities, and measure performance.

The research programmes are:

- Industry Strategy
- Global Growth Markets
- Fixed Broadband
- Mobile Broadband
- Voice
- Consumer Content and Applications
- Telecoms Software
- Fixed Networks
- Wireless Networks
- Core Data and Forecasts

For more information, visit our website at [www.analysismason.com](http://www.analysismason.com).

# Research from Analysys Mason

Analysys Mason provides a portfolio of research services that help organisations to understand major strategic shifts, as well as country- and region-specific trends, in the global telecoms industry. Through a combination of granular market data and forecasts, and independent qualitative analysis and insight, we enable clients to make informed strategic and tactical decisions, reduce risk and benchmark their business performance.

Split across five research streams, which cover core market data, infrastructure and technology, telecoms software, telecoms markets and wider industry dynamics, the research programmes provide a range of deliverables during a typical 12-month subscription period.

In addition to its subscription-based content, Analysys Mason also offers a custom research service, which helps clients to answer specific questions.

## Analysys Mason's research portfolio

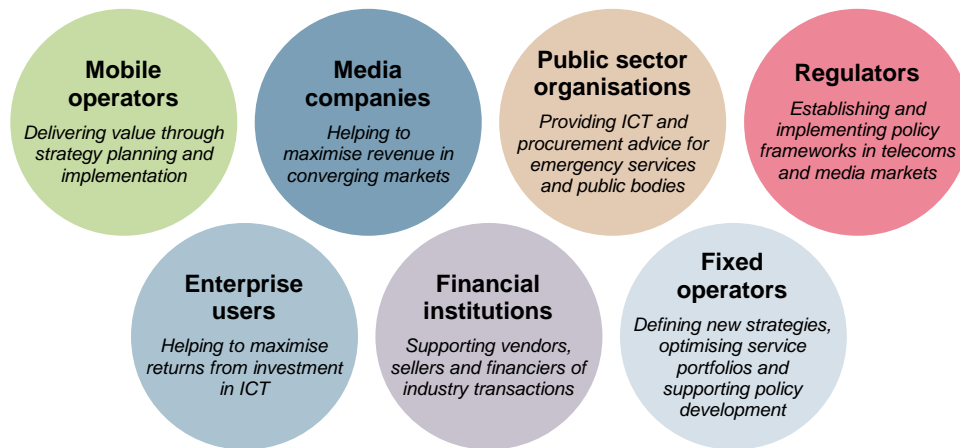

Research streams	Research programmes				
Industry Dynamics	Industry Strategy		Global Growth Markets		
Telecoms Markets	Fixed Broadband	Mobile Broadband	Voice	Consumer Content and Applications	
Telecoms Software 	Service Assurance	Billing and Customer Care	Service Fulfilment	Service Delivery Platform Strategies	
	Telecoms Software Strategies		Service Provider Strategies	Network Equipment Manufacturer Strategies	
Technology and Infrastructure	Fixed Networks		Wireless Networks		
Core Data and Forecasts	Country Reports	Telecoms Market Matrix	Core Forecasts	Telecoms Software Market Shares	Telecoms Software Forecasts

# Consulting from Analysys Mason

Analysys Mason offers consulting services that span the entire business development cycle from strategy development, through planning and implementation, to review. We help clients in the public and private sectors to make the best possible business decisions on many key issues, including investment, strategy, policy, procurement, network roll-out and market entry.

## Analysys Mason advises clients in many industry sectors

For more than 20 years, Analysys Mason has been working with a range of global clients to resolve business-critical issues by applying its intellectual rigour, passion and expertise.

For more information about our consulting services, please visit [www.analysismason.com/consulting](http://www.analysismason.com/consulting).
