

**Research report**

**Operator strategies for network  
evolution: the road to LTE**

Helen Karapandžić and Terry Norman

# Contents

About Analysys Mason	vi
0 Summary	vii
1 Wireless data growth will drive network evolution	1
1.1 Network evolution will be largely driven by consumer demand for services delivered over high-performance networks	1
1.2 Wireless network traffic from voice and data services will increase dramatically by 2015	2
1.3 The volume of traffic will erode revenue	4
2 Operators need to understand, and make, a complex array of technology choices	5
2.1 LTE offers a compelling proposition	5
2.2 There are other technology choices, including CDMA, TD-SCDMA and WiMAX, but most operators will migrate to LTE	8
2.3 Existing assets and legacy services will influence future deployment plans	11
2.4 LTE will not be deployed as a standalone layer, but as a complement to a dedicated indoor coverage mechanism	14
3 Spectrum issues will affect MNOs' LTE deployment strategies	18
3.1 Operators will deploy LTE in the IMT-2000 expansion band	18
3.2 The timing of GSM 900MHz (and GSM 1800MHz) spectrum refarming is critical	19
3.3 Digital dividend spectrum may be used for mobile communications	20
3.4 The US regulator has made spectrum available for Advanced Wireless Services	21
4 Device availability will be key to realising data growth	22
4.1 LTE-compatible devices will be available from 2H 2009	22
4.2 The first LTE-compatible devices are likely to support four frequency bands	23
4.3 Vendors have agreed a standardised royalty framework for LTE handsets	24
5 There are a number of pathways to LTE	25
5.1 The combined GSM and UMTS operator	25
5.2 The UMTS-only operator	26

5.3	GSM-only operators	26
5.4	CDMA operators	27
	Key to acronyms	30
	Research from Analysys Mason	31
	Consulting from Analysys Mason	32

## List of Figures and Tables

<b>Figure 0.1:</b>	Cornerstones of an operator's strategy for deploying a data-optimised network	vii
<b>Table 1.1:</b>	Factors that are driving the increase in wireless network data traffic	1
<b>Table 1.2:</b>	Key forecasts for mobile traffic in developed and developing regions	3
<b>Figure 1.1:</b>	Global wireless network traffic growth, 2008–2015	3
<b>Figure 1.2:</b>	The cost of data traffic using legacy networks, and revenue	4
<b>Figure 2.1:</b>	Typical mobile network costs per subscriber per cellular sector	5
<b>Figure 2.2:</b>	LTE can deliver profit by significantly reducing opex and capex	7
<b>Figure 2.3:</b>	All technology roadmaps can lead to LTE	9
<b>Table 2.1:</b>	SWOT analysis of migration from HSPA directly to LTE	12
<b>Table 2.2:</b>	SWOT analysis of migration from HSPA to HSPA+ (Release 7)	13
<b>Figure 2.4:</b>	Network traffic generated by an example mobile service mix, split between indoor and outdoor usage, 2008–2012	15
<b>Figure 3.1:</b>	Timeline for 2500–2690MHz spectrum auctions	18
<b>Figure 4.1:</b>	Expected LTE device availability	22
<b>Figure 5.1:</b>	LTE by geography/operator	28
<b>Figure 5.2:</b>	Deployment strategy guidelines	29

## Authors

**Helen Karapandžić** (Analyst) joined Analysys Mason in April 2007. Her research interests include wireless access, mobile broadband and mobile payment. Her most recent work includes several reports on the subjects of mobile payment, near field communications, WiMAX access technology and networks, radio access network evolution, mobile broadband and service bundling. Prior to joining Analysys Mason, Helen was Business Development Manager for an international asset management company, where she was responsible for Europe, the Middle East and Africa (EMEA). She has also held positions with Cambridge Investment Research (an independent, Cambridge-based strategy consultancy) and eBay AG. Helen has an MA in Modern Languages from the University of Cambridge.

**Terry Norman** leads Analysys Mason's *Wireless Networks* research and analysis programme, which focuses on the development of wireless access technologies and their commercial applications. Terry has more than 30 years' experience in the radio communications industry in radio planning, access network design, operations and latterly ten years consulting. He has authored numerous reports on the

subject of wireless access technologies. He has been quoted in the broadsheet press and regularly contributes to media analysis. Terry holds a doctorate in radio propagation, and is a Chartered Physicist and a member of the Institute of Physics and the Institute of Technology.

## **Acknowledgements**

The authors would like to thank all those who assisted in the preparation of this report: Anthony Berkeley (Director, LTE Strategy, Alcatel-Lucent), Dan Warren (Director of Technology, GSMA), Mats Blumenberg (LTE Product Line Management, Huawei), Stephane Daeuble (Senior Manager, Global Marketing, Motorola), Manash Goswami (Director of Business Development, Platforms and Mobile Devices, Motorola), Sami Jockinen (Senior Manager, Wireless Access Technology Marketing, Nokia), Peter Carson (Senior Director, Product Management, Qualcomm), Hervé Dubreil (Strategic Advisor, CTO Office, Orange Group), Frédéric Gastaldo (Head of Development, IT Services, Swisscom), Rico Schwendener (Head, Network Innovation Centre, Swisscom) and Jaime Lluch (Radio Access Technology Manager, Telefónica S.A.). The authors would also like to thank Analysys Mason colleagues Matt Hatton and Andrew Parkin-White for their input, and Sarah Peake and Claire Varley for editorial assistance.

## **Disclaimer**

Figures and projections contained in this report are based on publicly available information only and are produced by the Research Division of Analysys Mason Limited independently of any client-specific work within Analysys Mason Limited. The opinions expressed are those of the stated authors only.

Analysys Mason Limited recognises that many terms appearing in this report are proprietary; all such trademarks are acknowledged and every effort has been made to indicate them by the normal UK publishing practice of capitalisation. However, the presence of a term, in whatever form, does not affect its legal status as a trademark.

Analysys Mason Limited maintains that all reasonable care and skill have been used in the compilation of this publication. However, Analysys Mason Limited shall not be under any liability for loss or damage (including consequential loss) whatsoever or howsoever arising as a result of the use of this publication by the customer, his servants, agents or any third party.

# About Analysys Mason

Analysys Mason is the preferred partner to telecoms, IT and media organisations worldwide. Through our global presence, we deliver strategy advice, operations support and market intelligence to leading commercial and public sector organisations in more than 80 countries. Our clients rely on our consulting and research services to make better business decisions.

The intellectual rigour, operational experience and insight of our people have helped our clients to meet some of the toughest challenges they face within the industry. We have consistently delivered significant and sustainable business benefits to our clients during the past twenty years on issues ranging from advising on operator strategy and tactics, development of national sector regulation, through execution of major financial transactions, to the deployment of public and private network infrastructure.

We are respected worldwide for the exceptional quality of our work, our independence and the flexibility of our teams in responding to client needs. We are passionate about what we do and are committed to delivering excellence to our clients.

Analysys Mason offers two types of service:

## Consulting

We work with our clients to provide customised advice and support throughout the business cycle, helping major players to set strategy, plan for change and implement that change.

We have worked on a wide range of projects that support our partners and help them to increase revenue, reduce costs, plan for the future and minimise risk.

## Research

We offer research programmes and custom research to help our clients to identify key strategic issues, formulate strategies, identify trends and opportunities, and measure performance.

The research programmes are:

- Industry Strategy
- Global Growth Markets
- Fixed Broadband
- Mobile Broadband
- Voice
- Consumer Content and Applications
- Telecoms Software
- Fixed Networks
- Wireless Networks
- Core Data and Forecasts

For more information, visit our website at [www.analysismason.com](http://www.analysismason.com).

# Research from Analysys Mason

Analysys Mason provides a portfolio of research services that help organisations to understand major strategic shifts, as well as country- and region-specific trends, in the global telecoms industry. Through a combination of granular market data and forecasts, and independent qualitative analysis and insight, we enable clients to make informed strategic and tactical decisions, reduce risk and benchmark their business performance.

Split across five research streams, which cover core market data, infrastructure and technology, telecoms software, telecoms markets and wider industry dynamics, the research programmes provide a range of deliverables during a typical 12-month subscription period.

In addition to its subscription-based content, Analysys Mason also offers a custom research service, which helps clients to answer specific questions.

## Analysys Mason's research portfolio

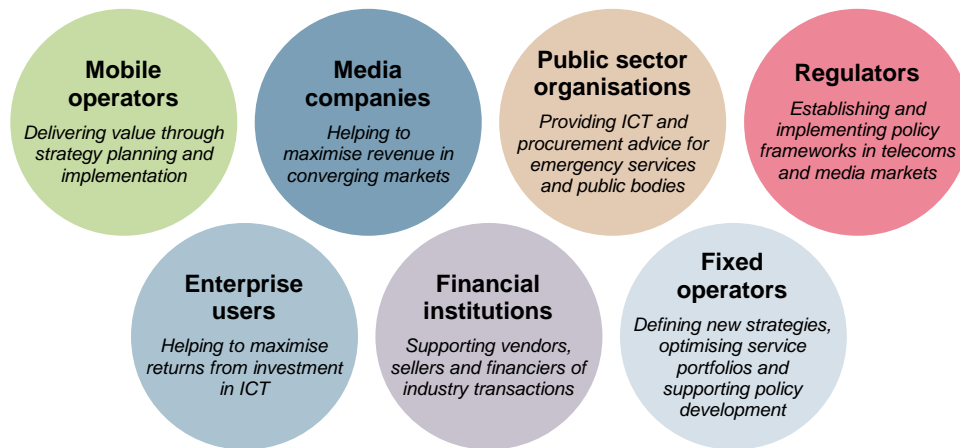

Research streams	Research programmes				
Industry Dynamics	Industry Strategy		Global Growth Markets		
Telecoms Markets	Fixed Broadband	Mobile Broadband	Voice	Consumer Content and Applications	
Telecoms Software 	Service Assurance	Billing and Customer Care	Service Fulfilment	Service Delivery Platform Strategies	
	Telecoms Software Strategies		Service Provider Strategies	Network Equipment Manufacturer Strategies	
Technology and Infrastructure	Fixed Networks		Wireless Networks		
Core Data and Forecasts	Country Reports	Telecoms Market Matrix	Core Forecasts	Telecoms Software Market Shares	Telecoms Software Forecasts

# Consulting from Analysys Mason

Analysys Mason offers consulting services that span the entire business development cycle from strategy development, through planning and implementation, to review. We help clients in the public and private sectors to make the best possible business decisions on many key issues, including investment, strategy, policy, procurement, network rollout and market entry.

## Analysys Mason advises clients in many industry sectors

For more than 20 years, Analysys Mason has been working with a range of global clients to resolve business-critical issues by applying its intellectual rigour, passion and expertise.

For more information about our consulting services, please visit [www.analysysmason.com/consulting](http://www.analysysmason.com/consulting).
