

**Research report**

Triple-play pricing study 4Q 2009: are prices on the rise?

Martin Scott

*January 2010*

# Contents [1]

## *Slide no.*

- 4. Document map – Executive summary**
5. Executive summary
- 6. Document map – Introduction and scope**
7. This report examines current and historical broadband, double- and triple-play pricing across Europe
8. Usage profiles model the difference between ‘light’, ‘typical’ and ‘heavy’ users
- 9. Document map – Service speed evolution**
10. The median downstream speeds of apartment-LAN and fibre reach 50Mbit/s, while cable continues to outpace DSL
11. Cable-modem upstream speeds continue to outpace DSL upstream speeds
12. The price per megabit per second continues to decline despite an increase in overall broadband prices
- 13. Document map – Country-by-country pricing comparison**
14. The price of entry-level broadband varies by a factor of ten across Europe
15. Double-play services can be cheaper than broadband-only, yet sometimes more expensive than triple-play
16. The cheapest markets for triple-play are frequently the most competitive rather than the cheapest for broadband-only

## *Slide no.*

- 17. Document map – Innovative light-usage tariffs**
18. Light-usage metered broadband services are a response to mobile broadband tariffs and saturating fixed take-up [1]
19. Light-usage metered broadband services are a response to mobile broadband tariffs and saturating fixed take-up [2]
- 20. Document map – Promotional pricing**
21. Fixed broadband promotions tend to have the features of one or more of the four basic types
22. The most popular pricing promotions are geared towards reducing barriers to entry
23. The top-ten promotions in terms of cost savings offer price reductions of 20–40%
- 24. Document map – Price premiums for higher speeds, voice and TV**
25. The price premium for ultra-fast broadband appears to have increased significantly in the second half of 2009
26. The price premium for voice and TV services varies significantly between markets

**About Analysys Mason**

## About Analysys Mason

Analysys Mason is the preferred partner of telecoms, IT and media organisations worldwide. Through our global presence, we deliver strategy advice, operations support and market intelligence to leading commercial and public sector organisations in more than 80 countries. Our clients rely on our consulting and research services to make better business decisions.

The intellectual rigour, operational experience and insight of our people have helped our clients to meet some of the toughest challenges they face within the industry. We have consistently delivered significant and sustainable business benefits to our clients during the past 20 years on issues ranging from advising on operator strategy and tactics, development of national sector regulation, through execution of major financial transactions, to the deployment of public and private network infrastructure.

We are respected worldwide for the exceptional quality of our work, our independence and the flexibility of our teams in responding to client needs. We are passionate about what we do and are committed to delivering excellence to our clients.

Analysys Mason offers two types of service:

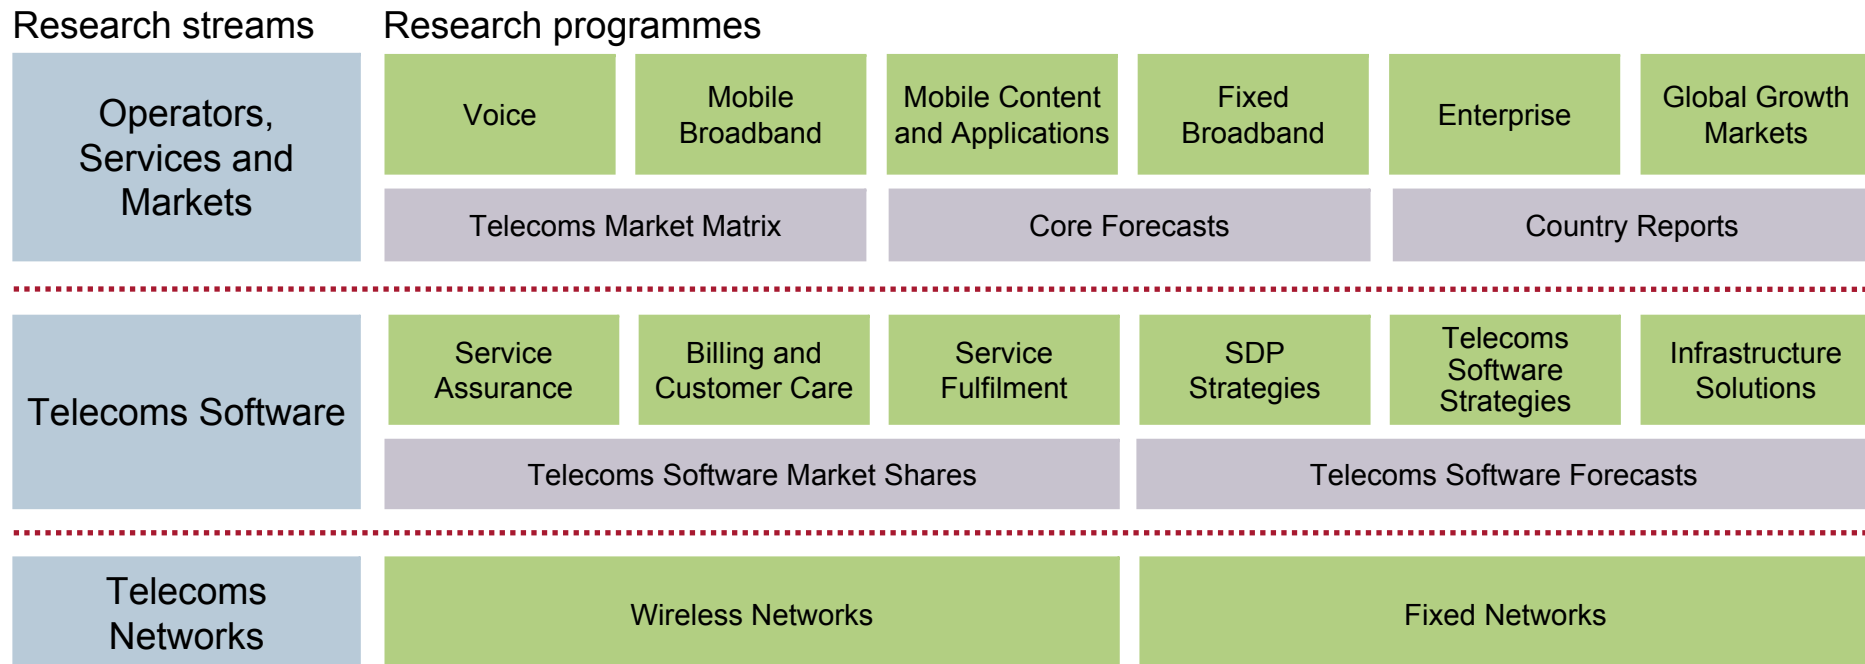

- **Consulting:** We work with our clients to provide customised advice and support throughout the business cycle, helping major players to set strategy, plan for change and implement that change. We have worked on a wide range of projects that support our partners and help them to increase revenue, reduce costs, plan for the future and minimise risk.
- **Research:** We offer research programmes and custom research to help our clients to identify key strategic issues, formulate strategies, identify trends and opportunities, and measure performance.

For more information visit our website at [www.analysismason.com](http://www.analysismason.com).

# Research from Analysys Mason

Analysys Mason provides a portfolio of research services that help organisations to understand major strategic shifts, as well as country- and region-specific trends, in the global telecoms industry. Through a combination of granular market data and forecasts, and independent qualitative analysis and insight, we enable clients to make informed strategic and tactical decisions, reduce risk and benchmark their business performance.

## Analysys Mason's research portfolio

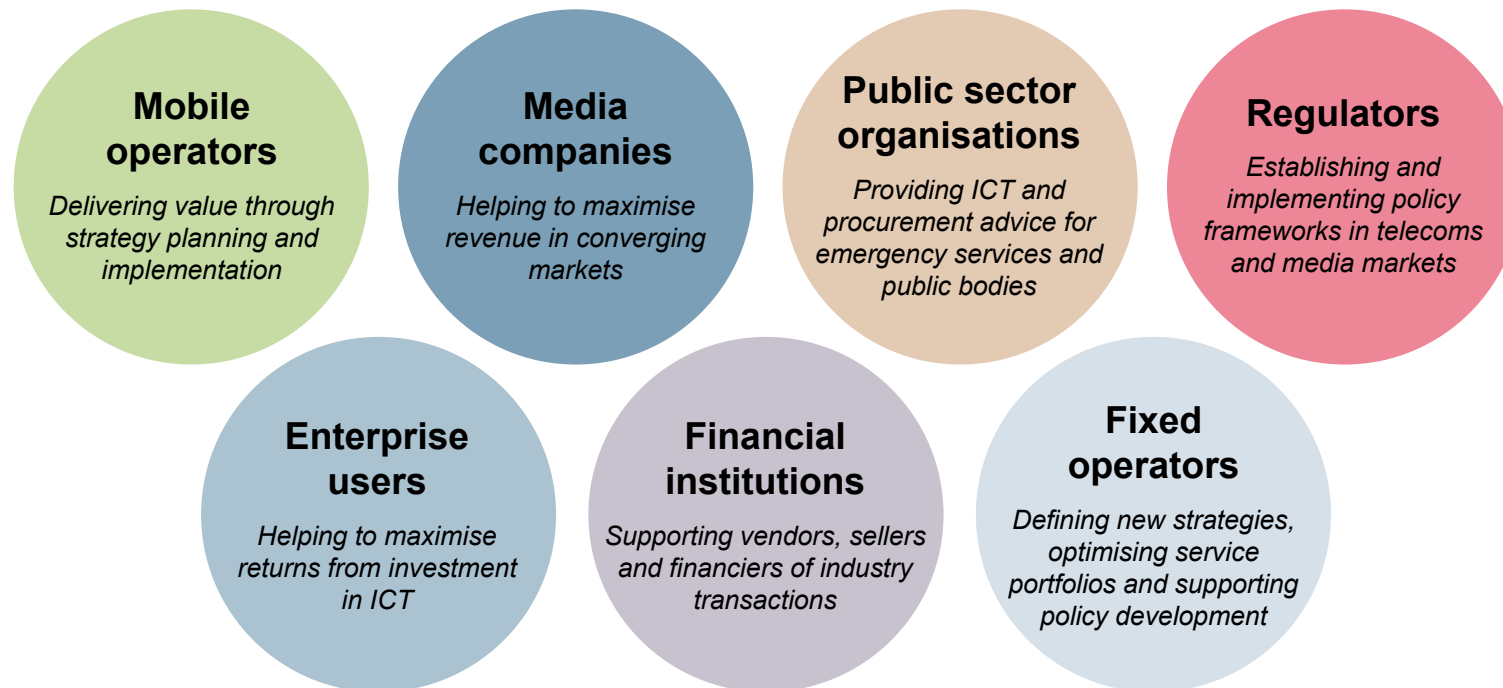

For more information about our research programmes and custom research services, please visit [www.analysismason.com/research](http://www.analysismason.com/research).

# Consulting from Analysys Mason

Analysys Mason offers consulting services that span the entire business development cycle from strategy development, through planning and implementation, to review. We help clients in the public and private sectors to make the best possible business decisions on many key issues, including investment, strategy, policy, procurement, network roll-out and market entry.

## Analysys Mason advises clients in many industry sectors
