

**Research report**

**Strategies for mobile broadband in CALA:  
forecasts and analysis 2009–2014**

**Matt Hatton (Research Director) and Terry Norman (Principal Analyst)**

*December 2009*

# Contents [1]

## *Slide no.*

### **4. Document map – Executive summary**

5. The number of mobile broadband connections will increase to 34 million by 2014
6. The mobile broadband market will generate almost EUR5 billion in 2014
7. MNOs must prepare for growth, acquire diverse spectrum assets, migrate to HSPA/LTE and learn from Europe
- 8. Document map – Introduction, scope and methodology**
9. About this report
10. Forecast series and geographical coverage
11. Methodology flowchart
12. In this report, we are using the following definition of 'mobile broadband'
13. Four factors will drive growth in the mobile broadband market in CALA
- 14. Document map – Spectrum issues**
15. A wide range of spectrum is available, each with different value for delivering mobile broadband [1]
16. A wide range of spectrum is available, each with different value for delivering mobile broadband [2]
17. A wide range of spectrum is available, each with different value for delivering mobile broadband [3]
18. More spectrum will be allocated soon

## *Slide no.*

19. Many regulators in CALA have restricted the amount of bandwidth each operator can hold
- 20. Document map – Technology choices**
21. MNOs in CALA have deployed a diverse mix of wireless technologies [1]
22. MNOs in CALA have deployed a diverse mix of wireless technologies [2]
23. The technologies that could deliver mobile broadband in the region [1]
24. The technologies that could deliver mobile broadband in the region [2]
25. The technologies that could deliver mobile broadband in the region [3]
26. The technologies that could deliver mobile broadband in the region [4]
27. A comparison of future mobile broadband technologies
28. Several factors will determine the roadmap that MNOs will follow when upgrading wireless technology
- 29. Document map – Current state of the market**
30. The fixed broadband, mobile and mobile broadband markets in Latin America in 2009
31. Latin America – Argentina
32. Latin America – Brazil
33. Latin America – Chile

# Contents [2]

## *Slide no.*

- 34. Latin America – Colombia
- 35. Latin America – Mexico
- 36. Latin America – Peru
- 37. Latin America – Venezuela
- 38. HSPA deployments in Latin America
- 39. The Caribbean – Anguilla
- 40. The Caribbean – Belize
- 41. The Caribbean – the Dominican Republic
- 42. The Caribbean – Guadeloupe
- 43. The Caribbean – Jamaica
- 44. Regional wireless diversity
- 45. Document map – Mobile broadband forecasts**
- 46. Mobile broadband penetration will grow relatively rapidly, especially in Brazil, Chile and Argentina
- 47. The number of mobile broadband connections will increase dramatically in the next five years
- 48. Argentina, Brazil and Chile will have the highest mobile broadband penetration rates in 2014
- 49. Growth in the number of mobile broadband connections will peak in 2010 as MNOs meet pent-up demand
- 50. Brazil will be the main driver of growth, although its importance will decline
- 51. In Argentina, fixed networks are relatively well developed and will limit the adoption of mobile broadband

## *Slide no.*

- 52. Brazil will dominate mobile broadband growth
- 53. Chile is the most advanced mobile broadband market and growth in the number of connections will continue
- 54. Colombia has potential, but low disposable income will limit adoption
- 55. A lack of competition and relatively high DSL adoption will limit growth in Mexico
- 56. A lack of competition and low disposable income will limit mobile broadband adoption in Peru
- 57. Mobile broadband adoption in Venezuela has been slow, but it will increase more quickly
- 58. Document map – Recommendations**
- 59. Recommendations
- 60. Document map – Authors, copyright and key to acronyms**
- 61. Authors
- 62. Copyright
- 63. Key to acronyms [1]
- 64. Key to acronyms [2]
- 65. Document map – List of figures and tables**
- 66. List of figures and tables [1]
- 67. List of figures and tables [2]
- 68. Document map – About Analysys Mason**
- 69. About Analysys Mason
- 70. Research from Analysys Mason
- 71. Consulting from Analysys Mason

**About Analysys Mason**

## About Analysys Mason

Analysys Mason is the preferred partner of telecoms, IT and media organisations worldwide. Through our global presence, we deliver strategy advice, operations support and market intelligence to leading commercial and public sector organisations in more than 80 countries. Our clients rely on our consulting and research services to make better business decisions.

The intellectual rigour, operational experience and insight of our people have helped our clients to meet some of the toughest challenges they face within the industry. We have consistently delivered significant and sustainable business benefits to our clients during the past 20 years on issues ranging from advising on operator strategy and tactics, development of national sector regulation, through execution of major financial transactions, to the deployment of public and private network infrastructure.

We are respected worldwide for the exceptional quality of our work, our independence and the flexibility of our teams in responding to client needs. We are passionate about what we do and are committed to delivering excellence to our clients.

Analysys Mason offers two types of service:

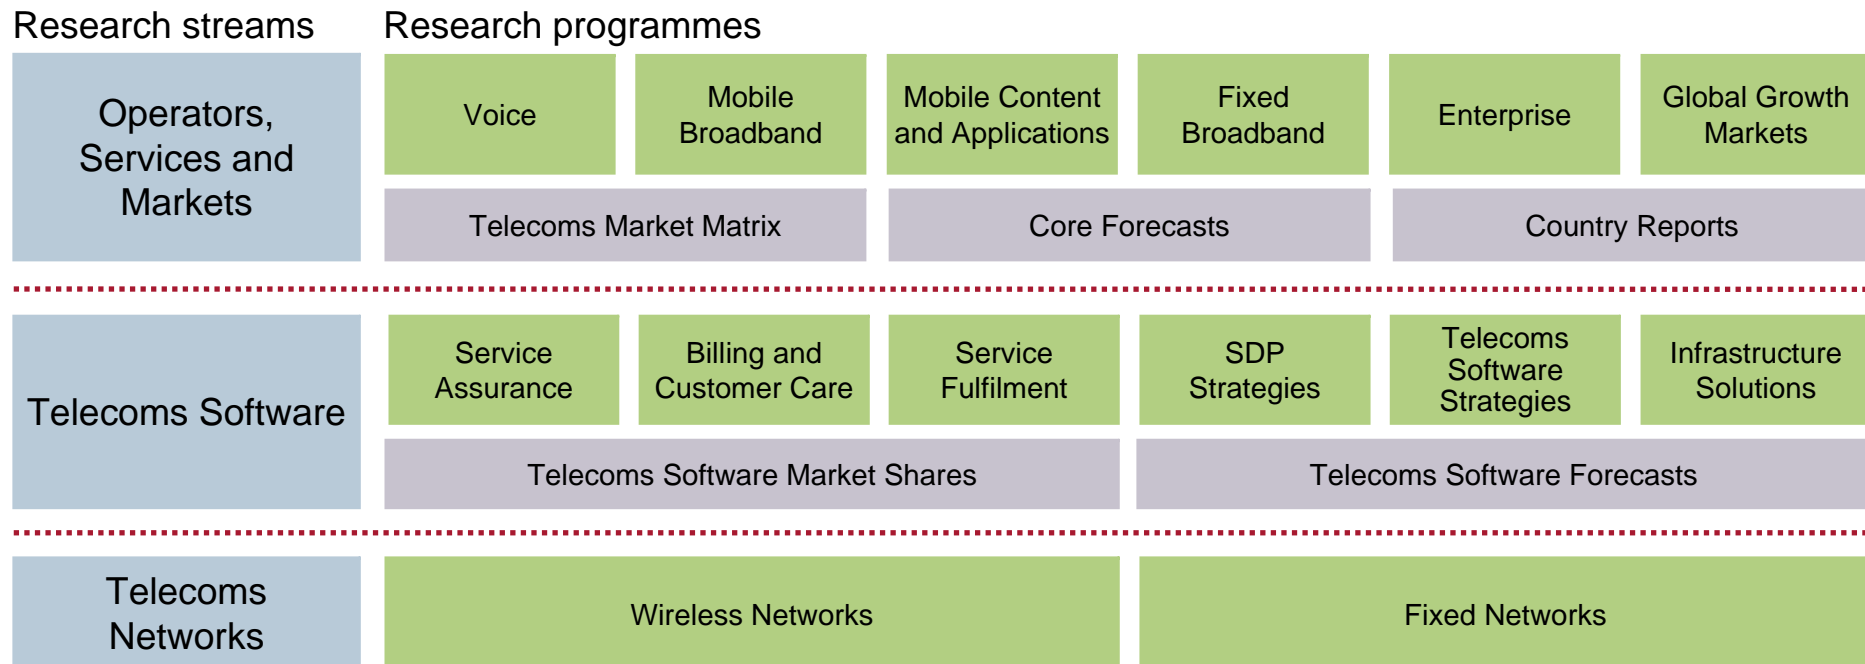

- **Consulting:** We work with our clients to provide customised advice and support throughout the business cycle, helping major players to set strategy, plan for change and implement that change. We have worked on a wide range of projects that support our partners and help them to increase revenue, reduce costs, plan for the future and minimise risk.
- **Research:** We offer research programmes and custom research to help our clients to identify key strategic issues, formulate strategies, identify trends and opportunities, and measure performance.

For more information visit our website at [www.analysismason.com](http://www.analysismason.com).

# Research from Analysys Mason

Analysys Mason provides a portfolio of research services that help organisations to understand major strategic shifts, as well as country- and region-specific trends, in the global telecoms industry. Through a combination of granular market data and forecasts, and independent qualitative analysis and insight, we enable clients to make informed strategic and tactical decisions, reduce risk and benchmark their business performance.

## Analysys Mason's research portfolio

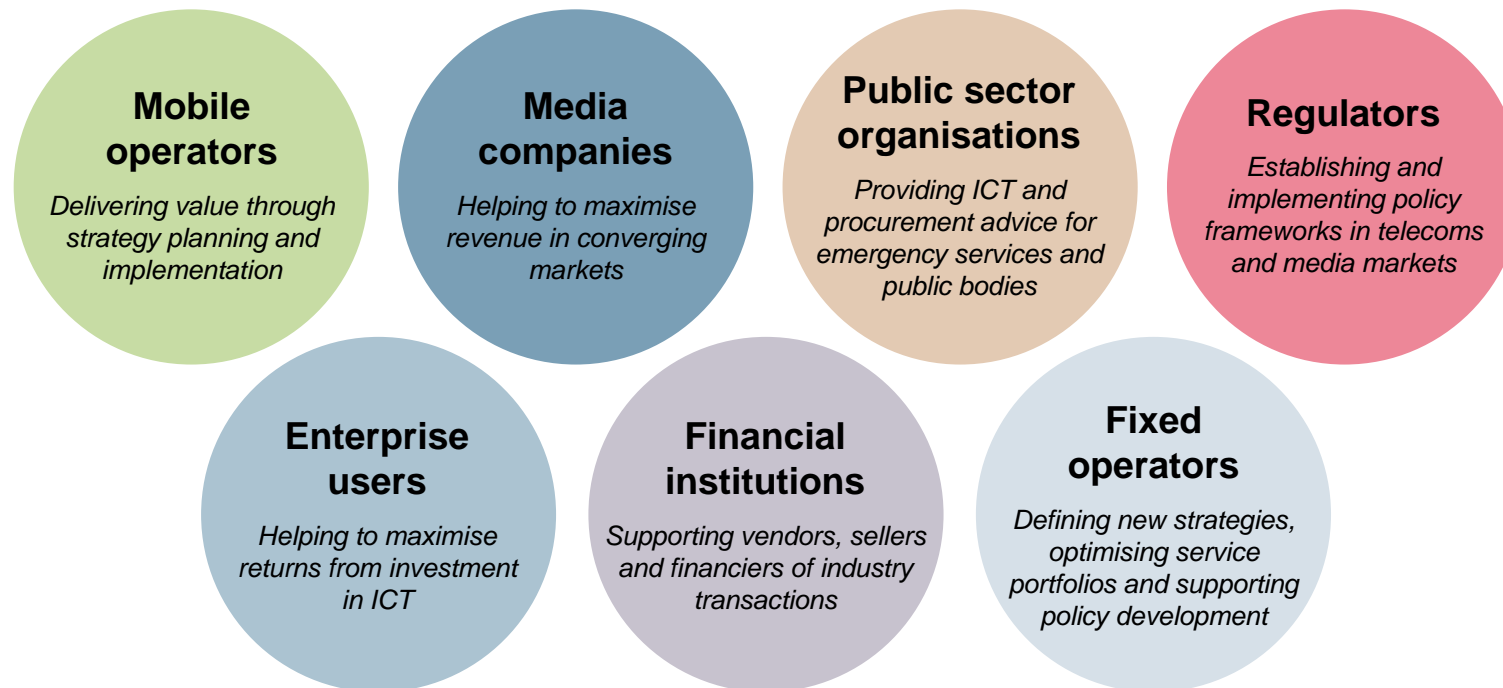

For more information about our research programmes and custom research services, please visit [www.analysismason.com/research](http://www.analysismason.com/research).

# Consulting from Analysys Mason

Analysys Mason offers consulting services that span the entire business development cycle from strategy development, through planning and implementation, to review. We help clients in the public and private sectors to make the best possible business decisions on many key issues, including investment, strategy, policy, procurement, network roll-out and market entry.

## Analysys Mason advises clients in many industry sectors
