

Research report

Mobile broadband survey: analysing consumer attitudes and usage

Matt Hatton (Research Director) and Martin Scott (Senior Analyst)

January 2010

Contents [1]

Slide no.

4. **Document map – Executive summary**
5. Mobile broadband is mostly complementary and has dedicated users, but non-users are sceptical
6. MNOs must tackle the bundling and channel implications of mobile broadband
7. **Document map – Introduction**
8. Introduction
9. France has lagged behind other European markets in mobile broadband, but is catching up
10. Germany has experienced steady growth after early pace-setting by T-Mobile and Vodafone
11. Poland has experienced fierce competition and more substitution with DSL and cable
12. The UK mobile broadband market is highly competitive and growing rapidly
13. **Document map – Results**
14. Awareness of mobile broadband is high, particularly in Poland and the UK
15. Mobile broadband is most popular with men and with the young
16. Older age groups represent attractive targets for mobile broadband service providers
17. Across the board, respondents indicate little intent to buy mobile broadband
18. Mobile broadband users represent an attractive cross-selling opportunity

Slide no.

19. Some users are becoming very attached to their mobile broadband services
20. Mobile broadband is largely complementary to fixed, and MNOs must be prepared for churn
21. Mobile broadband is mostly treated as another home connection
22. Unsurprisingly, the most frequent users are the highest spenders
23. Subscribers who are exposed to mobile broadband are critical
24. Mobile broadband is perceived as too expensive, but reliability is less of an issue
25. UK respondents are most scathing about mobile broadband
26. French respondents are particularly price conscious, but with good reason
27. German respondents also flag up price as a big barrier to substitution
28. Respondents in Poland speak from experience of mobile broadband and are the most critical of coverage
29. Most survey respondents, except for those in Poland, disagree that “mobile broadband is for me”
30. Users are more critical than non-users, except when it comes to price

About Analysys Mason

About Analysys Mason

Analysys Mason is the preferred partner of telecoms, IT and media organisations worldwide. Through our global presence, we deliver strategy advice, operations support and market intelligence to leading commercial and public sector organisations in more than 80 countries. Our clients rely on our consulting and research services to make better business decisions.

The intellectual rigour, operational experience and insight of our people have helped our clients to meet some of the toughest challenges they face within the industry. We have consistently delivered significant and sustainable business benefits to our clients during the past 20 years on issues ranging from advising on operator strategy and tactics, development of national sector regulation, through execution of major financial transactions, to the deployment of public and private network infrastructure.

We are respected worldwide for the exceptional quality of our work, our independence and the flexibility of our teams in responding to client needs. We are passionate about what we do and are committed to delivering excellence to our clients.

Analysys Mason offers two types of service:

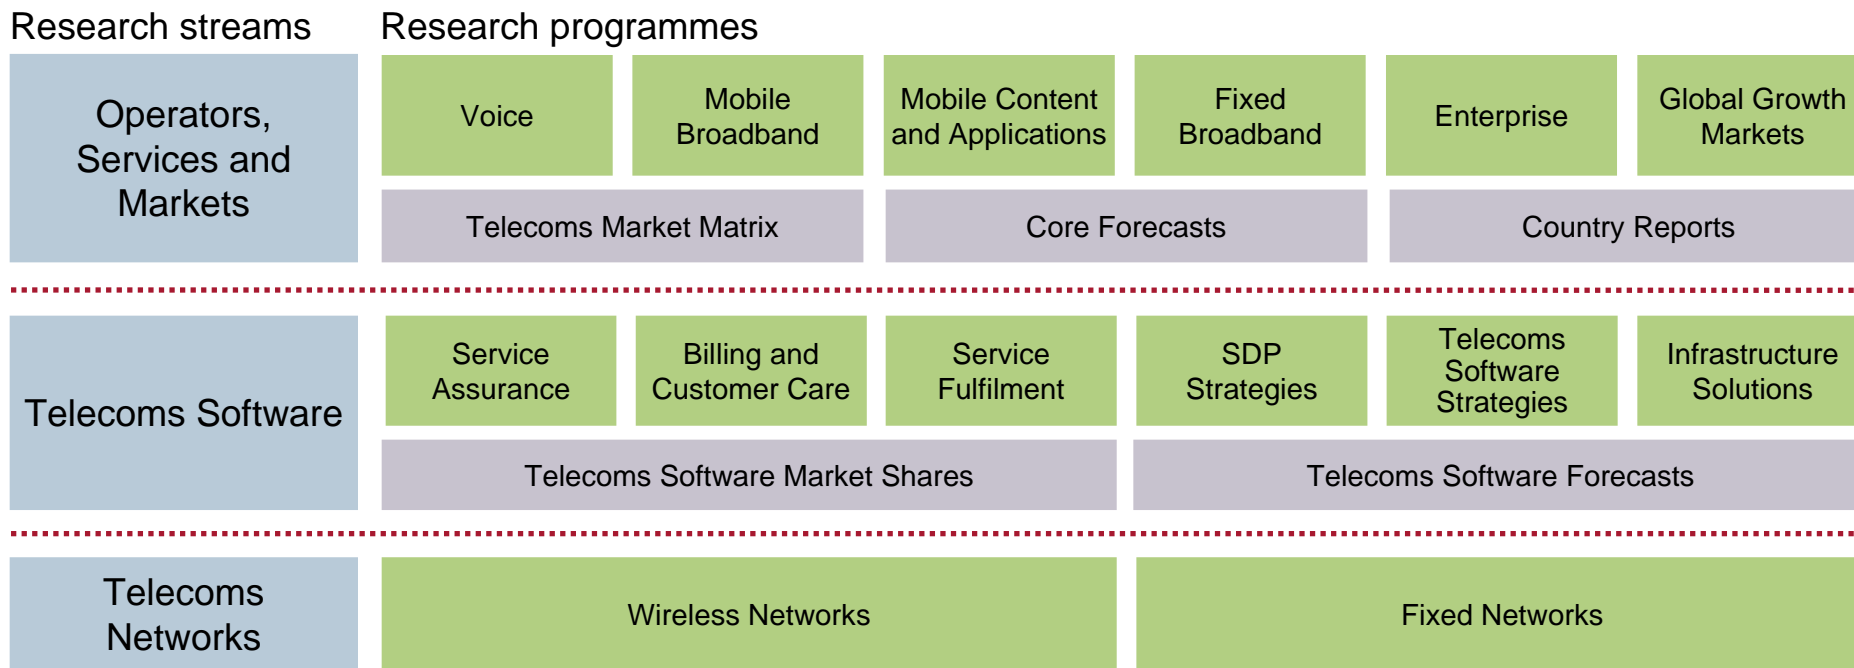

- **Consulting:** We work with our clients to provide customised advice and support throughout the business cycle, helping major players to set strategy, plan for change and implement that change. We have worked on a wide range of projects that support our partners and help them to increase revenue, reduce costs, plan for the future and minimise risk.
- **Research:** We offer research programmes and custom research to help our clients to identify key strategic issues, formulate strategies, identify trends and opportunities, and measure performance.

For more information visit our website at www.analysysmason.com.

Research from Analysys Mason

Analysys Mason provides a portfolio of research services that help organisations to understand major strategic shifts, as well as country- and region-specific trends, in the global telecoms industry. Through a combination of granular market data and forecasts, and independent qualitative analysis and insight, we enable clients to make informed strategic and tactical decisions, reduce risk and benchmark their business performance.

Analysys Mason's research portfolio

For more information about our research programmes and custom research services, please visit www.analysismason.com/research.

Consulting from Analysys Mason

Analysys Mason offers consulting services that span the entire business development cycle from strategy development, through planning and implementation, to review. We help clients in the public and private sectors to make the best possible business decisions on many key issues, including investment, strategy, policy, procurement, network roll-out and market entry.

Analysys Mason advises clients in many industry sectors
