

Research report

**Mobile consumer survey: the mobile Internet
and application usage**

Jim Morrish (Principal Analyst) and Martin Scott (Senior Analyst)

January 2010

Contents [1]

Slide no.

- 4. Document map – Executive summary**
- 5. Our mobile consumer survey is based on the responses of more than 4000 interviewees
- 6. The main factors that influence usage of mobile media services are: age and access to a touchscreen phone
- 7. Mobile Internet access is the most-popular media service
- 8. Document map – Introduction**
- 9. Introduction
- 10. Document map – Results**
- 11. Results – Summary**
- 12. Usage of mobile media services is strongly skewed towards younger age groups
- 13. Age is a more significant factor in mobile phone and mobile media usage than country or gender
- 14. Users with contracts are more likely to use mobile media services
- 15. Users of touchscreen phones show a significantly higher propensity to use mobile media services
- 16. Users of application stores and VoD services tend to use more services than other media service users
- 17. There appear to be no strong cross linkages between the usage of different services
- 18. Internet access is the most-popular mobile media service among users who employ only one service

Slide no.

- 19. Results – TV**
- 20. Of respondents, 8.4% have used mobile TV services during the past year
- 21. Mobile TV seems to be particularly popular in France, and among male users
- 22. Mobile TV users in the 35–44 age range seem to consume the most content
- 23. Consumption of mobile TV is higher in Poland than in the other countries surveyed
- 24. Results – Video clips (VoD)**
- 25. Viewing of mobile video clips is strongly skewed to younger age groups
- 26. Usage of mobile VoD services is reasonably consistent between countries
- 27. For mobile VoD services, 25–34 year-olds appear to be the heaviest users
- 28. Usage of VoD services appears to be lower in the UK than in other surveyed countries
- 29. Results – Music**
- 30. 18–24 year-olds are about three times more likely to use mobile music services than those aged 55 or over
- 31. Mobile music is more popular in Poland than in other surveyed countries
- 32. Usage levels for mobile music services do not vary greatly by age group, up to 54 year-olds

Slide no.

- 33. Usage patterns for mobile music services appear to be relatively consistent across the survey sample
- 34. Results – Games**
- 35. Usage of mobile games is heavily skewed towards the 18–24 age group
- 36. Consumers in Poland are more likely to use mobile games than those in other surveyed countries
- 37. Results – Internet access**
- 38. Usage of mobile Internet access services seems equally common among mobile media users of all ages
- 39. Usage of mobile Internet services does not vary greatly by country, but is slightly more popular among men
- 40. Among mobile Internet users, usage appears to be heavier in younger age groups
- 41. Users in the UK, contract subscribers, touchscreen phone users and men all seem to be heavier users of the Internet
- 42. Results – Application stores**
- 43. Application store usage is significantly skewed towards younger age groups
- 44. Usage of application stores varies significantly by country and gender

Slide no.

- 45. Results – Non-use of mobile media services**
- 46. Several factors deter consumers from using mobile media services
- 47. Inability or unwillingness to pay for mobile media services particularly affects younger users
- 48. The reasons for not using mobile media services differ significantly by market segment
- 49. For further information
- 50. Document map – Methodology**

About Analysys Mason

About Analysys Mason

Analysys Mason is the preferred partner of telecoms, IT and media organisations worldwide. Through our global presence, we deliver strategy advice, operations support and market intelligence to leading commercial and public sector organisations in more than 80 countries. Our clients rely on our consulting and research services to make better business decisions.

The intellectual rigour, operational experience and insight of our people have helped our clients to meet some of the toughest challenges they face within the industry. We have consistently delivered significant and sustainable business benefits to our clients during the past 20 years on issues ranging from advising on operator strategy and tactics, development of national sector regulation, through execution of major financial transactions, to the deployment of public and private network infrastructure.

We are respected worldwide for the exceptional quality of our work, our independence and the flexibility of our teams in responding to client needs. We are passionate about what we do and are committed to delivering excellence to our clients.

Analysys Mason offers two types of service:

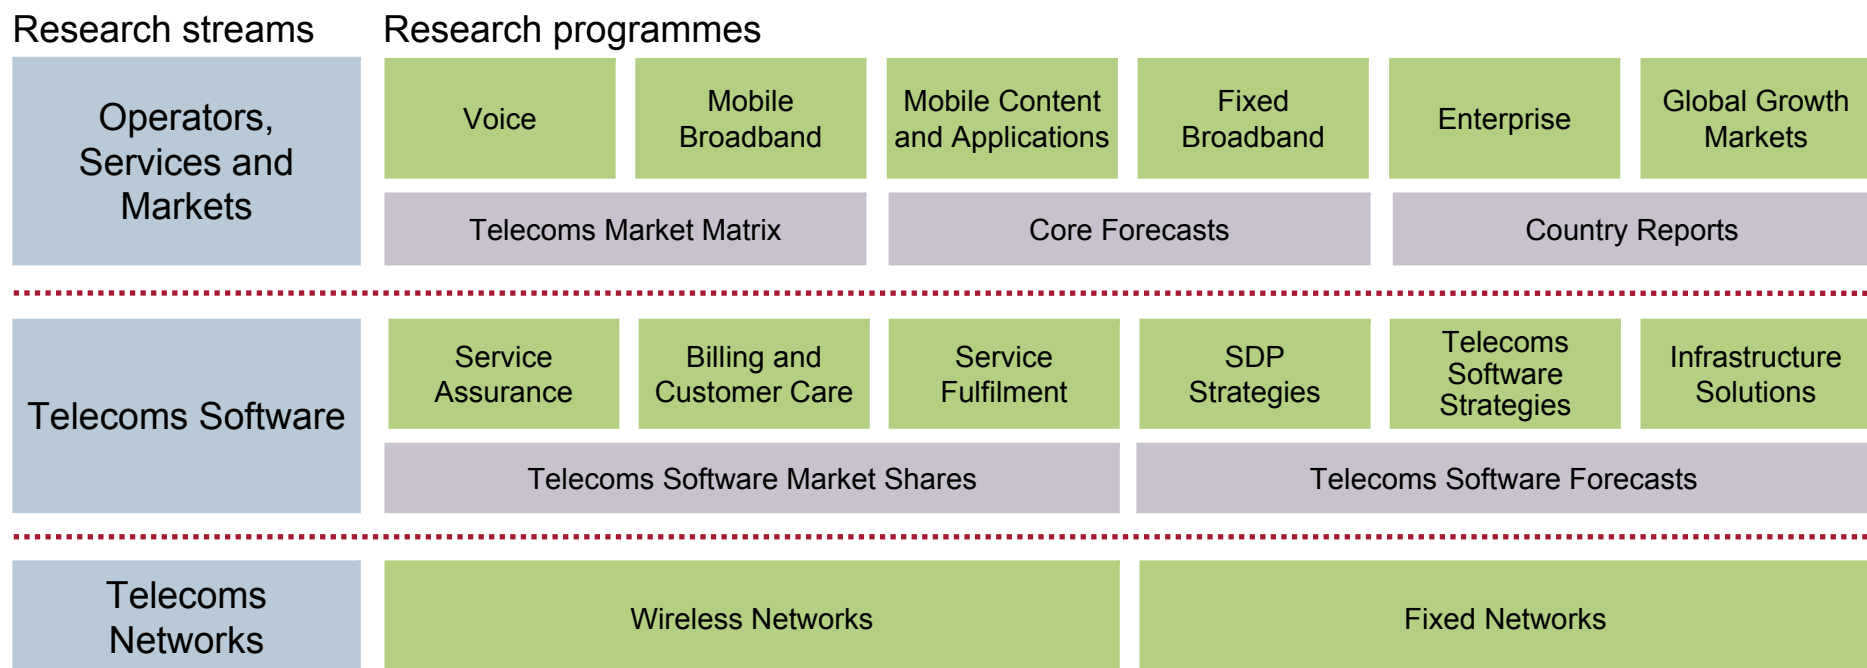

- **Consulting:** We work with our clients to provide customised advice and support throughout the business cycle, helping major players to set strategy, plan for change and implement that change. We have worked on a wide range of projects that support our partners and help them to increase revenue, reduce costs, plan for the future and minimise risk.
- **Research:** We offer research programmes and custom research to help our clients to identify key strategic issues, formulate strategies, identify trends and opportunities, and measure performance.

For more information visit our website at www.analysismason.com.

Research from Analysys Mason

Analysys Mason provides a portfolio of research services that help organisations to understand major strategic shifts, as well as country- and region-specific trends, in the global telecoms industry. Through a combination of granular market data and forecasts, and independent qualitative analysis and insight, we enable clients to make informed strategic and tactical decisions, reduce risk and benchmark their business performance.

Analysys Mason's research portfolio

For more information about our research programmes and custom research services, please visit www.analysismason.com/research.

Consulting from Analysys Mason

Analysys Mason offers consulting services that span the entire business development cycle from strategy development, through planning and implementation, to review. We help clients in the public and private sectors to make the best possible business decisions on many key issues, including investment, strategy, policy, procurement, network roll-out and market entry.

Analysys Mason advises clients in many industry sectors
