

# Google's submarine cable investments in Chile

## Submarine cables deployed

Curie

2020

## Other cables landing in Chile

SAC

SAm-1

SPSC/Mistral

## Google's Milestones

Curie, the first cable in which Google invested in Chile, was ready for service in 2020

Curie was the first cable ready for service in Chile in 19 years

Curie is the only cable connecting Chile to the west coast of the US

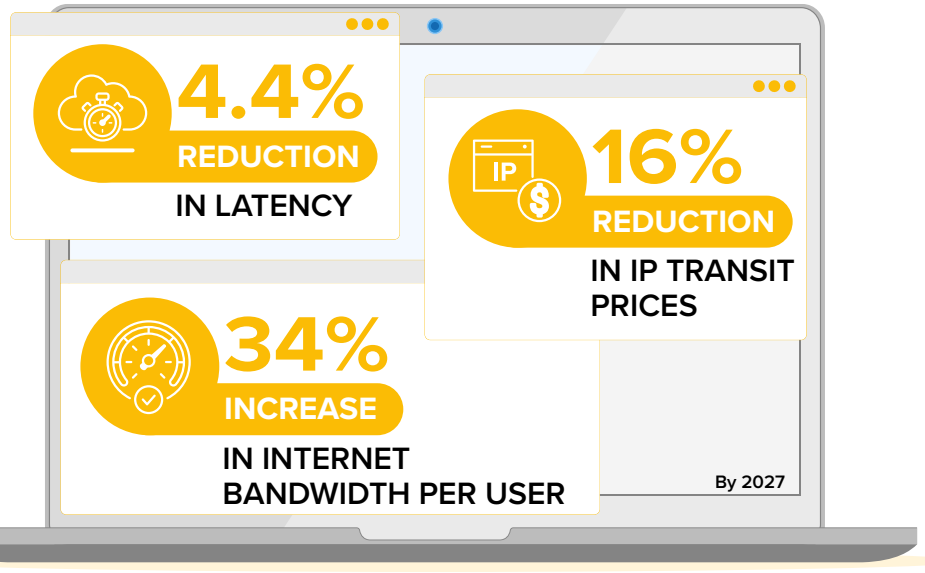

↑  
30%

As a result of Google's investment in Curie, international submarine cable capacity potentially accessible by Chile has increased by over 30%

## Benefits to digital environment

Curie will enable better connectivity in Chile, in the form of higher international bandwidth, lower latency, and lower prices for capacity (e.g. IP transit)

## Economic Impact

**Better connectivity supply unlocks greater demand**

for internet access and data consumption, which help increase annual GDP in 2027 by

**1.00% or  
USD3.6 billion**

(at 2021 prices)

Between 2020 and 2027, Curie will cumulatively unlock

**USD19.2 billion**

(at 2021 prices)

in GDP, supporting the creation of around

**67 900 jobs**

by 2027
