Google's Milestones

Curie, the first cable in which Google invested in Panama, was ready for service in 2020

Curie was the second cable ready for service in Panama in 19 years

Curie was the first submarine cable ready for service connecting Panama to the west coast of the US since 2000

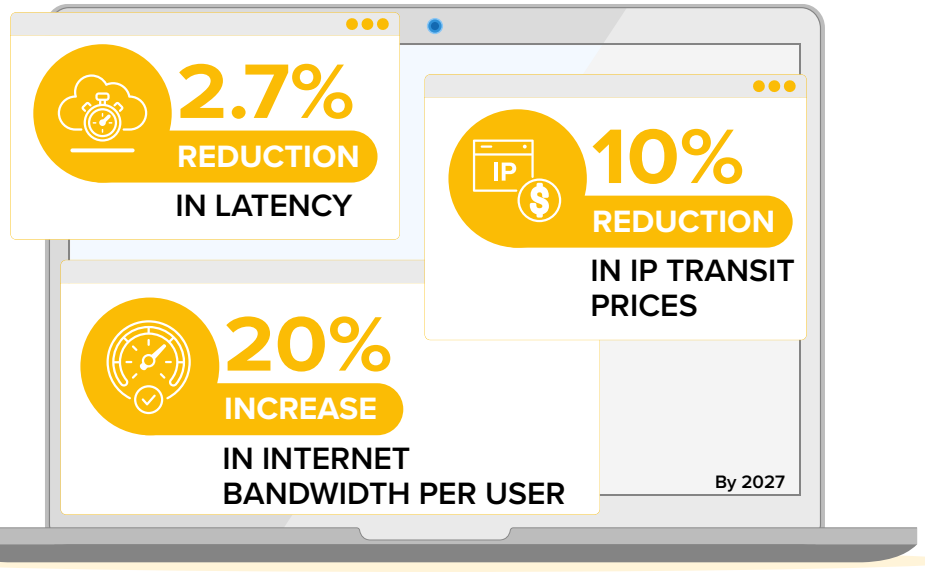

↑
30%

As a result of Google's investment in Curie, international submarine cable capacity potentially accessible by Panama has increased by over 30%

Benefits to digital environment

Curie will enable better connectivity in Panama, in the form of higher international bandwidth, lower latency, and lower prices for capacity (e.g. IP transit)

Economic Impact

Better connectivity supply unlocks greater demand

for internet access and data consumption, which help increase annual GDP in 2027 by

**0.67% or
USD584 million**

(at 2021 prices)

Between 2020 and 2027, Curie will cumulatively unlock

USD3.0 billion (at 2021 prices)

in GDP, supporting the creation of around

6100 jobs

by 2027
