

Google's submarine cable investments in Uruguay

Submarine cables deployed

Tannat

2018

Firmina

2023

Other cables landing in Uruguay

Bicentenario

Unisur

Google's Milestones

Tannat, the first cable in which Google invested in Uruguay, was ready for service (RFS) in 2018

Tannat was the first cable in which an internet company invested to be RFS in Uruguay, and Google has subsequently invested in Firmina which is expected to be RFS in 2023

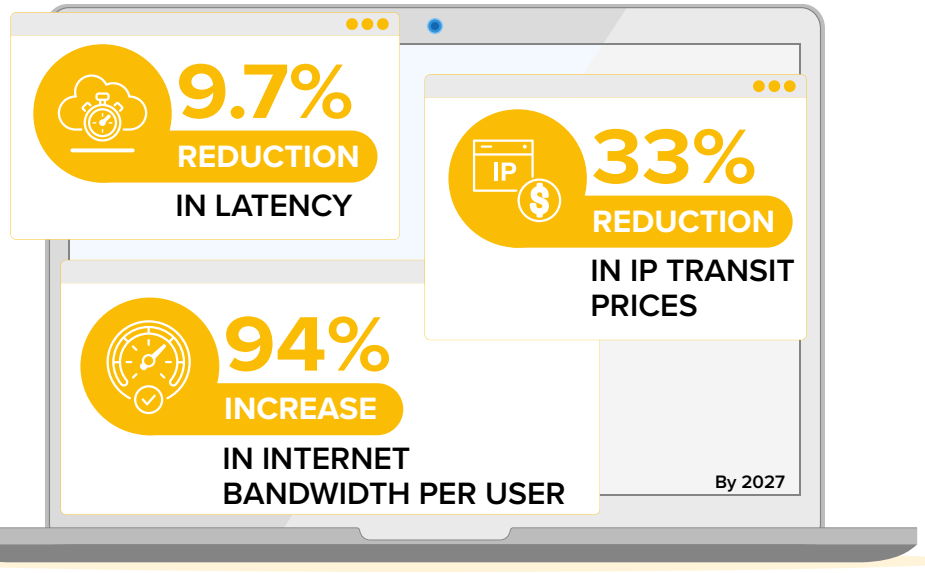

Firmina will be the first cable connecting Uruguay to the US directly

Benefits to digital environment

Tannat and Firmina will enable better connectivity in Uruguay, in the form of higher international bandwidth, lower latency, and lower prices for capacity (e.g. IP transit)

Economic Impact

Better connectivity supply unlocks greater demand for internet access and data consumption, which help increase annual GDP in 2027 by

**2.14% or
USD1.5 billion**

(at 2021 prices)

Between 2018 and 2027, Tannat and Firmina will cumulatively unlock

USD7.7 billion (at 2021 prices)

in GDP, supporting the creation of around

18 300 jobs

by 2027
