DataHub version log | 8 September 2026

What's new in this release?

- The **Telecoms** dataset was updated with multiple new forecasts and associated historical data
- The **IT** dataset was updated with new forecast data
- The **Space** dataset now features data from the new Maritime satellite communications market forecast

The notes below summarise the most recent updates to each dataset, listed in descending date order. Full details of the coverage, vintage and metrics for each dataset are available in the downloadable Excel full metrics lists file or the at-a-glance dataset coverage and versions summary.

Next update

In late September 2026, the **Telecoms** dataset will be updated with core historical data to 2Q 2026 for all the countries that we cover. We will also update the fixed–mobile convergence (FMC) tracker to 2Q 2026. The release will also include new core forecasts for North America (NA) based on 1Q 2026 data, and pay-TV forecasts for emerging Asia–Pacific.

The next DataHub update will also include an update to the Space dataset with an updated Satellite Capacity supply and demand forecast.

Notes on recent updates

A full list of previous updates is available here.

Telecoms dataset (last updated September 2026)

This release includes new core forecasts for emerging Asia–Pacific (EMAP) and developed Asia–Pacific (DVAP), based on 1Q 2026 data. It also includes refreshed core forecasts for the Middle East and North Africa (MENA), Western Europe (WE) and Central and Eastern Europe (CEE). The business forecasts were fully updated for MENA, and the Worldwide core and business forecast results were updated to reflect all the regional changes.

The release also introduces the metric name changes listed below. While the metric definitions remain unchanged, the names have been updated to better reflect what each metric covers.

- Mobile – handset *becomes* Mobile – handset services
- Mobile – data *becomes* Mobile – data-only services

The table below provides an overview of the latest versions of our core actuals and forecasts data.

Telecoms dataset: summary of latest publication versions of core forecasts and actuals by region

	Telecoms forecasts			Telecoms actuals		
Region	**Publication date**	**Based on historical data up to:**	**Update status**	**Publication date**	**Historical data up to:**	**Update status**
Worldwide forecasts/ Financial KPIs (all regions)[1]	30-Aug-26	4Q 2024	Refreshed	03-Jul-26	1Q 2026	
North America	26-Jun-26	4Q 2024		02-Jul-26	1Q 2026	
Latin America	26-Jun-26	1Q 2025		06-Aug-26	1Q 2026	Refreshed
Western Europe	27-Aug-26	3Q 2025	Refreshed	10-Jul-26	1Q 2026	
Central and Eastern Europe	27-Aug-26	3Q 2025	Refreshed	10-Jul-26	1Q 2026	
Developed Asia–Pacific	25-Aug-26	1Q 2026	NEW	25-Aug-26	1Q 2026	Refreshed
Emerging Asia–Pacific	27-Aug-26	1Q 2026	NEW	25-Aug-26	1Q 2026	Refreshed
Middle East and North Africa	30-Aug-26	4Q 2025	Refreshed	10-Jul-26	1Q 2026	
Sub-Saharan Africa	26-Jun-26	3Q 2025		03-Jul-26	1Q 2026	

[1] Worldwide forecasts are present in Telecoms forecasts, Financial KPIPs (all regions) are present in Telecoms actuals, with worldwide scope

'Refreshed' indicates a minor change to an existing dataset and 'NEW' indicates a full new version.

Core and topic forecasts in the **Telecoms** dataset have different update cycles. These publication dates reflect the latest changes to Telecoms core forecasts.

Full details of the coverage and vintage of each dataset element can be found in the downloadable Excel Analysys Mason DataHub full metrics lists file or the at-a-glance dataset coverage and versions summary.

IT dataset (last updated September 2026)

Data for all geographies was updated in August 2026 and is based on 1Q 2026 historical data.

Space dataset (last updated September 2026)

The **Space** dataset now includes data for the latest version of the Maritime satellite communications market forecast. This data has been released ahead of publication of the accompanying report.

Please note that the *Earth Observation* research programme has been renamed to *Space Data and AI* (as of 21 July 2026).

The **Space** dataset includes data from 18 forecast reports from the Space research practice. The next table shows the latest version of each report present in the DataHub in descending order of publication date.

Space dataset: report title	Publication date
Maritime satellite communications market: trends and forecasts 2025–2035	Aug-26
MSS and D2D satellite services for government and military organisations: trends and forecasts 2025–2035	Aug-26
M2M and IoT via satellite: trends and forecasts 2025–2035	Jun-26
Aero satellite communications: trends and forecasts 2025–2035	Jun-26
Satellite backhaul and trunking: trends and forecasts 2025–2035	Jun-26
Space cloud computing and AI: trends and forecasts, 2025-2035	Jun-26
Global space economy 2026: trends and forecasts	May-26
Consumer and enterprise broadband via satellite: worldwide trends and forecasts 2024–2034	Mar-26
Commercial satellite communications ground equipment: trends and forecasts 2024–2034	Mar-26
Connected vehicles via satellite: worldwide trends and forecasts 2024–2034	Feb-26
Satellite consumer direct-to-device services: trends and forecasts 2024–2034	Feb-26
Military commercial satellite communication: trends and forecasts 2024–2034	Jan-26
Satellite-based Earth observation: trends and forecasts 2024–2034	Oct-25
Satellite capacity supply and demand: trends and forecasts 2024–2034	Sep-25
Flat-panel satellite antennas: trends and forecasts 2024–2034	Sep-25
Satellite manufacturing and launch services: trends and forecasts 2024–2034	Sep-25
In-orbit satellite services: trends and forecasts 2024–2034	Apr-25
Lunar market: trends and forecasts 2024–2034	Mar-25

Enhancements to the DataHub application

On 13 July 2026, we released a new version of the Analysys Mason DataHub, featuring extensive data from the Space research practice alongside other interface improvements. We have introduced colour-coding across each of the datasets and in the supporting materials, and the dataset tabs have been reordered to reflect the expanded range of content.

The most significant changes in this release are summarised below.

- The addition of the extensive **Space** dataset. The Space dataset includes nearly 4000 metrics from 18 forecast reports on the satellite and space industries.
- The **IT** dataset is the new name for the SMB Technology Forecaster. You can view the data associated with each **IT** module using data views, which slice the data into topic-based sections.
- The **Telecoms** dataset is the new name for the Telco portal. The **Telecoms actuals** tab now includes data views, which allows you to quickly access topic-specific slices of the dataset, such as Financial KPIs.
