

Operator business services: Canada forecast 2018–2023

Catherine Hammond

Contents

5. Executive summary

- 6. Executive summary: revenue growth will be driven by fixed and mobile data and IoT connectivity, as well as other value-added business services
- 7. Implications for operators

8. Forecast results

- 9. Operator business revenue in Canada will grow as revenue from data services and other business services continues to increase
- 10. Most of the revenue growth for small businesses will come from broadband, but other business services will drive revenue growth for large enterprises
- 11. Mobile data revenue is expected to grow significantly, and we expect a further increase in the number of handset connections
- 12. Revenue growth from broadband will largely offset declines in legacy fixed voice services revenue
- 13. High-bandwidth services for both broadband and dedicated connections will continue to grow in importance
- 14. The addressable market for other business services will continue to grow as enterprises adopt further cloud-based business solutions
- 15. Operator revenue from other business services forms a small but rapidly growing share of overall business revenue
- 16. The broader enterprise IT and managed services market reaches beyond those services addressed by operators and is currently worth around CAD70 billion

17. Operator profiles

- 18. The Canadian business market is characterised by a mix of regional incumbents, cable challengers and B2B specialists

- 19. Cable operators' share of the business broadband market is growing, and alternative operators are finding revenue growth in business data services

20. Bell Canada Enterprises

21. TELUS

22. Rogers Communications

23. Regional operators

24. Forecast methodology and assumptions

- 25. Forecast methodology and assumptions: presentation of results
- 26. Forecast methodology and assumptions: market definition
- 27. Forecast methodology and assumptions: modelling approach
- 28. Forecast methodology and assumptions: mobile services
- 29. Forecast methodology and assumptions: fixed services [1]
- 30. Forecast methodology and assumptions: fixed services [2]
- 31. Forecast methodology and assumptions: other business services [1]
- 32. Forecast methodology and assumptions: other business services [2]
- 33. Forecast methodology and assumptions: broader IT categories

About the author and Analysys Mason

About the author

Catherine Hammond (Principal Analyst) is member of Analysys Mason's *Enterprise and IoT* research programme, specialising in market forecasting. She previously worked for nine years as a Senior Manager within Analysys Mason's Consulting practice, undertaking work for a wide range of operators, regulators and government agencies in Europe and Asia. Her work included the development and review of quantitative models, assessment of business plans, development of market forecasts, collation and analysis of benchmarks, development of white papers and leading client workshops and major presentations. She holds an MA in mathematics from the University of Cambridge.

Analysys Mason's consulting and research are uniquely positioned

Analysys Mason's consulting services and research portfolio

Consulting

We deliver tangible benefits to clients across the telecoms industry:

- communications and digital service providers, vendors, financial and strategic investors, private equity and infrastructure funds, governments, regulators, broadcasters and service and content providers

Our sector specialists understand the distinct local challenges facing clients, in addition to the wider effects of global forces.

We are future-focused and help clients understand the challenges and opportunities new technology brings.

Research

Our dedicated team of analysts track and forecast the different services accessed by consumers and enterprises.

We offer detailed insight into the software, infrastructure and technology delivering those services.

Clients benefit from regular and timely intelligence, and direct access to analysts.
