About this report

This report analyses the demand for telecoms services in Hungary by micro, small and medium-sized enterprises (SMEs) and large enterprises, expressed in terms of revenue, connections or users, and average revenue per user (ARPU).¹

It highlights that operator enterprise revenue in Hungary will grow during the forecast period and identifies the key drivers behind this trend.

It quantifies the market for fixed and mobile voice and data services, IoT connectivity services, and other business services such as security, co-location and hosting, enterprise mobility and software-as-a-service (SaaS).

The report is based on several sources, including data from operators, the Hungarian Central Statistical Office, the National Media and Infocommunications Authority and from Analysys Mason's 2017 survey on enterprises' telecoms and ICT usage.

WHO SHOULD READ THIS REPORT

- Operators that want to identify key areas for revenue growth, both in terms of enterprise segments and individual services.
- Vendors that are considering targeting the enterprise market.
- Third-party service providers seeking collaborative relations with operators.

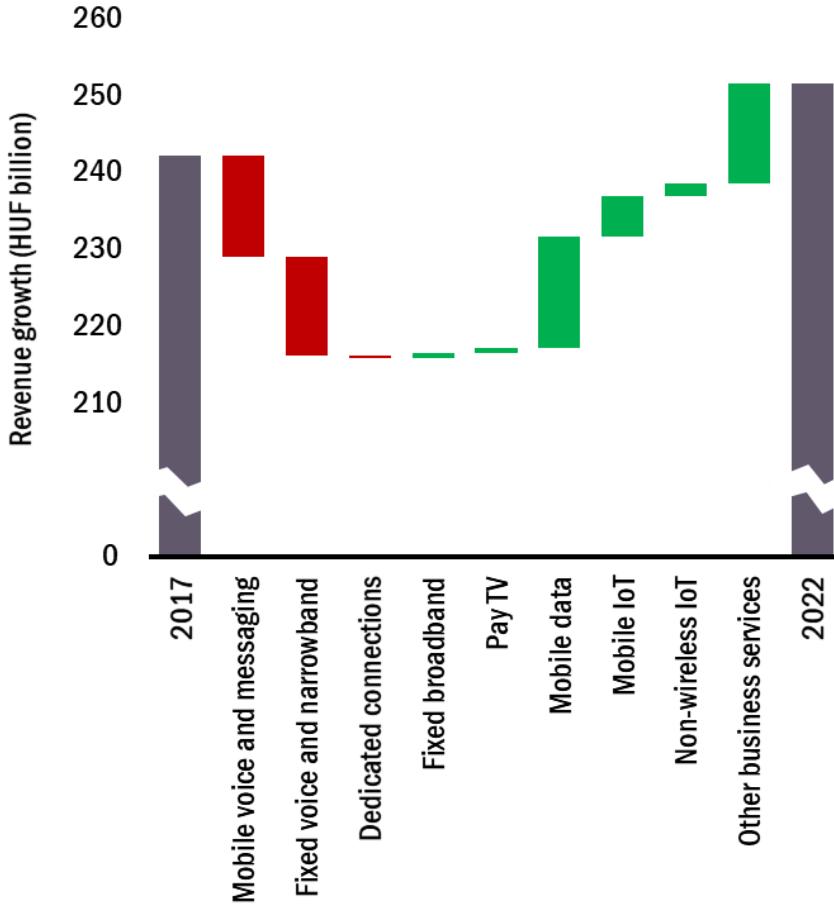

¹ For the complete data set, see Analysys Mason's [DataHub](#).

REPORT COVERAGE		
Geographical	Services ²	Other business services:
Countries modelled individually: <ul style="list-style-type: none"> ▪ Hungary 	Mobile: <ul style="list-style-type: none"> ▪ Voice, messaging and handset data ▪ Mobile broadband ▪ IoT connectivity (mobile and LPWA) Fixed: <ul style="list-style-type: none"> ▪ Narrowband and VoBB ▪ ADSL/SDSL, vDSL, FTTP/B, cable, BFWA, other fixed broadband ▪ Dedicated connections up to 100Mbps, >100Mbps and up to 1Gbps, and >1Gbps ▪ Traditional managed services ▪ IoT connectivity (non-wireless) ▪ Pay TV 	Other business services: <ul style="list-style-type: none"> ▪ Unified communications ▪ Security ▪ Co-location and hosting ▪ Private cloud ▪ Software-as-a-service (SaaS, public cloud) ▪ Platform-as-a-service (PaaS, public cloud) ▪ Infrastructure-as-a-service (IaaS, public cloud) ▪ Enterprise mobility ▪ Desktop management
Enterprise size Segments: <ul style="list-style-type: none"> ▪ Micro (0–9 employees) ▪ Small (10–49 employees) ▪ Medium (50–249 employees) ▪ Large (250+ employees) 		

² See service taxonomy in the 'Forecast methodology and assumptions' section of this report.

Executive summary: operator enterprise revenue will increase, primarily due to growth in mobile data and other business services revenue

Figure 1: Change in telecoms operator retail revenue from enterprises by service type (where red denotes a decrease, and green an increase), Hungary, 2017–2022¹

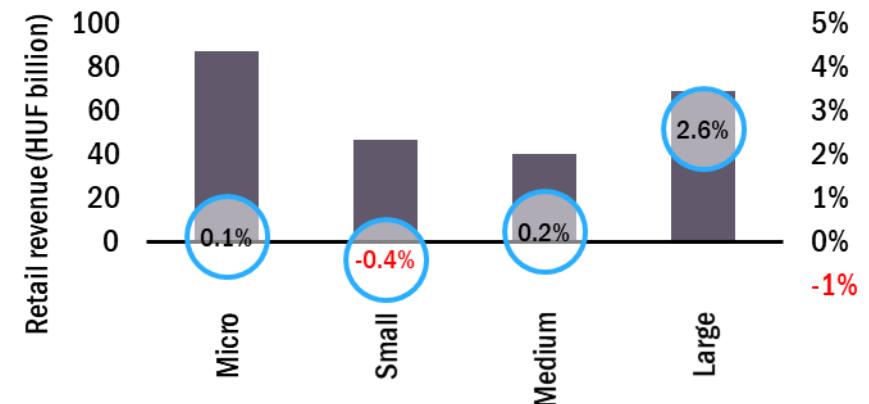

¹ See *Presentation of results* in the Methodology section of this report for full definitions of the aggregate categories presented in figures.

Figure 2: Connections for enterprises and CAGRs by type of connection, Hungary, 2017–2022¹

Connection type	Connections (thousand)		CAGR 2013–2017	CAGR 2017–2022
	2017	2022		
Mobile handsets	2000	2100	2.0%	1.0%
Mobile broadband	300	200	7.9%	-7.8%
Mobile IoT	700	3600	15.3%	38.8%
Fixed voice	700	500	-5.0%	-6.5%
Fixed broadband	320	350	2.2%	1.8%
Fixed dedicated lines	23	24	4.6%	0.9%
Non-wireless IoT	500	800	13.6%	9.9%

Figure 3: Telecoms operator retail revenue from enterprises in 2017 and CAGR for 2017–2022 by enterprise size, Hungary, 2017¹

FORECAST METHODOLOGY AND ASSUMPTIONS

ABOUT THE AUTHORS AND ANALYSYS MASON

About the authors

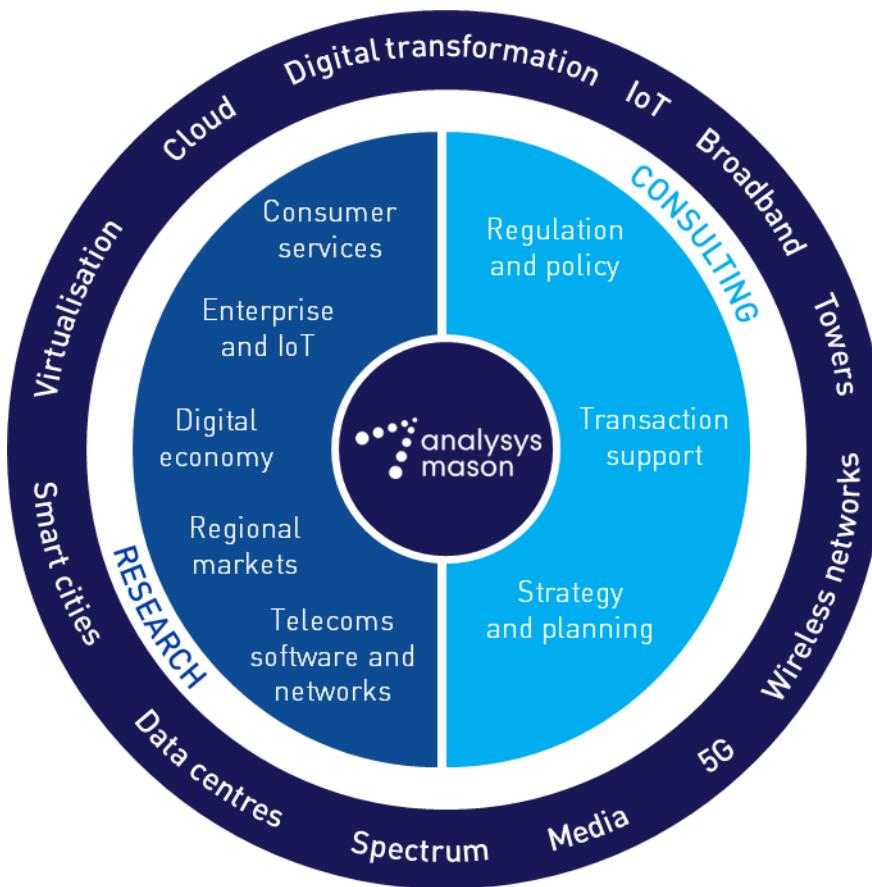

Igor Babic (Research Analyst) is a member of Analysys Mason's *Enterprise and IoT* research practice and is mainly focusing on market forecasting and enterprise research commentaries. Prior to joining Analysys Mason, he completed a BEng in Engineering Business Management at Warwick and an MPhil in Industrial Systems, Manufacture and Management at Cambridge.

Catherine Hammond (Principal Analyst) is an analyst for Analysys Mason's *Enterprise and IoT* research programme, specialising in market forecasting. She previously worked for nine years as a Senior Manager within Analysys Mason's Consulting practice, undertaking work for a wide range of operators, regulators and government agencies in Europe and Asia. Her work included the development and review of quantitative models, assessment of business plans, development of market forecasts, collation and analysis of benchmarks, development of white papers and leading client workshops and major presentations. She holds an MA in mathematics from the University of Cambridge.

Analysys Mason's consulting and research are uniquely positioned

Analysys Mason's consulting services and research portfolio

CONSULTING

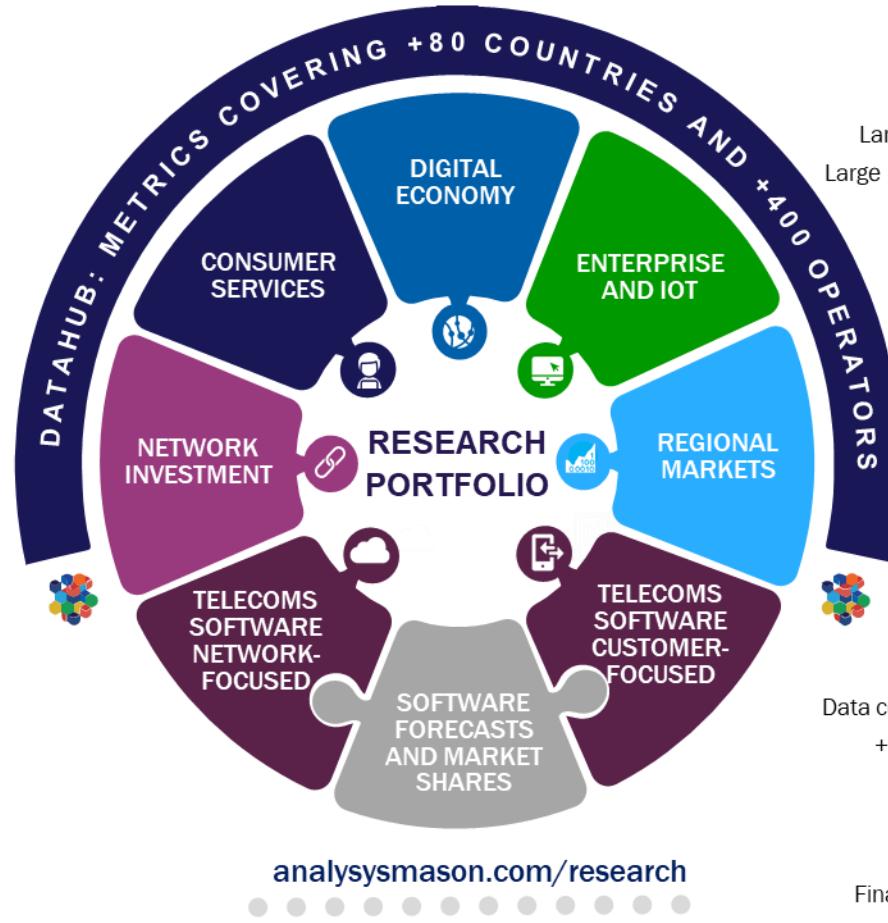

- We deliver tangible benefits to clients across the telecoms industry:
 - communications and digital service providers, vendors, financial and strategic investors, private equity and infrastructure funds, governments, regulators, broadcasters, and service and content providers.
- Our sector specialists understand the distinct local challenges facing clients, in addition to the wider effects of global forces.
- We are future-focused and help clients understand the challenges and opportunities that new technology brings.

RESEARCH

- Our dedicated team of analysts track and forecast the different services accessed by consumers and enterprises.
- We offer detailed insight into the software, infrastructure and technology delivering those services.
- Clients benefit from regular and timely intelligence, and direct access to analysts.

Research from Analysys Mason

Consulting from Analysys Mason

REGULATION AND POLICY

- Policy development and response
- Ex-ante market reviews, remedies, costing ...
- Universal Service Obligation (USO)
- Scarce resources: radio spectrum management, auction support, numbering ...
- Ex-post/abuse of dominance
- Postal sector

TRANSACTION SUPPORT

- Commercial due diligence
- Technical due diligence
- Mergers and acquisitions (M&As)
- Debt and initial public offerings (IPOs)
- Joint-venture structuring
- Mid-market financial sponsors

STRATEGY AND PLANNING

- Commercial expertise
- Technology optimisation
- New digital frontiers
