

# GenAI and the telecoms sector: three scenarios for 2033

Tom Rebbeck

## About this report

This report explores how generative artificial intelligence (GenAI) could impact the telecoms industry. It describes three distinct scenarios for the future of the telecoms industry in 2033. The impact of GenAI on the telecoms industry will vary in each scenario, as will the opportunities and threats that this technology presents to operators and vendors.

The report is intended to provide an initial framework for how telecoms operators and vendors think about, and respond to, GenAI. It explores the potential impact of GenAI on the structure of the sector as a whole and its impact on individual functions within telecoms operators' businesses.

The report should be of value for all parties interested in the future of the telecoms industry, but it provides specific recommendations for telecoms operators and vendors.

The fundamental ideas developed in this report were first presented at a workshop attended by members of Analysys Mason's research and consulting divisions. We have also read a range of secondary research reports on GenAI, some of which relate directly to telecoms but most of which explore the evolving impact of GenAI more widely.

No part of this report was written by GenAI, though we did use GenAI tools to assist in the research.

This document is for Analysys Mason's customers only. Usage is subject to the terms and conditions in our copyright notice.

### KEY QUESTIONS ANSWERED IN THIS REPORT

- How will GenAI impact the telecoms industry?
- How will that impact affect the services, functional areas and the structure of the telecoms industry?
- How should different players in the telecoms industry respond to GenAI?

### WHO SHOULD READ THIS REPORT

- Strategy teams in telecoms operators, telecoms vendors, regulators and other parties interested in future developments in the sector.

About the author and Analysys Mason

# Our research services

- 
**Consumer Services**  
 Fixed Broadband Services  
 Mobile Services  
 Fixed-Mobile Convergence  
 Smart Devices  
 Future Comms  
 Video, Gaming and Entertainment
  
- 
**Networks**  
 Next-Generation Wireless Networks  
 Wireless Infrastructure Strategies  
 Fibre Infrastructure Strategies  
 Operator Investment Strategies  
 Telecoms Strategy and Forecast  
 Transport Network Strategies
  
- 
**Applications**  
 Network Automation and Orchestration  
 Customer Engagement  
 Monetisation Platforms  
 Digital Experience  
 Automated Assurance  
 Service Design and Orchestration  
 Telecoms Software Market Shares
  
- 
**Satellite and Space**  
 Satellite Strategies for Telcos

## Operator Business Services and IoT

- Enterprise Services
- SME Services
- IoT Services
- Private Networks
- Cyber Security

## SMB IT Channels and Forecasts

- SMB Technology Forecaster

## Regional Markets

- Global Telecoms Data and Financial KPIs
- Americas
- Asia-Pacific
- Middle East and Africa
- European Core Forecasts
- European Telecoms Market Matrix
- European Country Reports

## Cloud

- Cloud Infrastructure Strategies
- Data, AI and Development Platforms
- Edge and Media Platforms
- Multi-Cloud Networking

## DataHub

- Forecast data for 80 countries
- Telco portal: ~2800 forecast and ~320 historical metrics
- SMB Technology Forecaster portal: ~120 000 forecast metrics
